Thread: {Contest} ~~ Upgrading 2 members to l33t/ub3r ~~ Winners Announced!

Cetric - *June 21, 2015, 7:29 pm*

As some of you all know I have gambled my BTC and turned it into 1 btc and promised to give some of it away. Well heres what I decided.. I will prolly do a giveaway later but for now I am upgrading 2 members to l33t or ub3r. If you are ub3r there will be no prize and you wont win. This is so that people can get something for the forum and stuff.. if all you want is free money wait for my giveaway.

Alright so heres how to enter. Post below explaining why you should win and dont make it like 1 sentence and boring but make sure its work the 15 or 25 dollar upgrade.

WINNERS ANNOUNCED!
CrackerSensei will win L33t
AND
Jet?Life will win Ub3r

I will pm winners the information needed.

Silent Storm™ - *June 21, 2015, 7:31 pm*

This is a nice contest your hosting Cetric, good luck to everyone entering.

Why did you join hackforums?:
I actually joined because I wanted to be a part of an online community that goes over topics relating to technology. I was never really a part of a forum and one day I decided to just do a google search "hacking forum", this was the result that appeared. I have been coming to this great place ever since.

What do you want to achieve here?:
My goal is to expand my knowledge on a variety of subjects regarding computers. I will achieve this by not only helping others with the subjects that I already currently know but also expanding my knowledge with the endless supply of informative HQ threads that make up HF. In my spare time I like to make free graphics in the graphics section and respond to posters in the beginner hacking section. I'm also into politics and really would like to comment in the political section but cannot do so without obtaining the upgrade.

What do you enjoy doing?:
I like to program (C++, python, Java), I'm a grey hat, I enjoy to make graphics using photoshop and after effects, I highly enjoy the realm of mathematics and physics, and I am into politics. HF helps me satisfy most areas of my hobbies.

Notable Threads:
TF2 Package giveaway
20 animated signatures giveaway
Free Signature 1
Free Signature 2
Free Logo 1

Free Avatar
Free Logo 2
Free Signature 3
Free Signature 4
TF2 giveaway 2

This one's not so much of a contribution but it took me a couple days to crack that code, and I did it for fun:
Code cracking challenge

If I am considered it would really mean a lot to me. Thanks!
Thanks for the contest OP, you are doing us all a favour!

Best wishes

I'd like to apply for the ub3r upgrade I gamble quite a bit and have a little success. I co-run a successfull account generator here on HF and would really like this upgrade.
Thanks Op

I feel I deserve this upgrade because I am a good user on HF. I host giveaways, help everyone I can out, make informative posts, and most of all, try to make people smile. I was recently approved for ub3r as well!

I'd love to be a leet, I just want to start my own LoL/steam Shop and nobody seems to trust me.. only members with shit rep PM to deal with em and they want me to go first... I have been scammed here twice and the members are still out there without being harmed because I'm a normal member after all who cant do shit to em (Even Though i Reported them). I've given away a lot of stuff here, I've even given away a LoL account with shit ton of rare legacy skins and also PAX TF skin.. I never got the chance to have something in return..;D So if I could just win this, I'd be happy as fuck and maybe do you a feat massage :D

Thank you OP for this giveaway and good luck for everyone ;)

Maybe you could do an Ep1c upgrade? if not, could I win and give the upgrade of l33t to a friend on here?

Hi, I have been here a long time and would really like to get the epic upgrade. I don't really have much time to get on here like I used to which saddens me, but I still love the community just as much as I did before. I've done various giveaways and contests in the past, for things like Christmas and Halloween, and other things like Free Graphic Design. I always try and help people out in the graphics requests section and I used to help out in the VIP Area GFRBYWFS forum. I just would love to get another upgrade as it has been a long time since I've got anything from here which would be nice. Once I get another job I will probably do some more giveaways but I'm broke at the moment.

Hello.

First of I would like to say that this is a great contribution to the forum.
it will definately make members like myself stay to try and win a price like this and on the other hand also make a friendship out of it.
I would love to win l33t because that would first of all mean better communication with all of HF, I got a full PM box everyday and that means harder communication with ub3rs such as yourself who have contributed more than enough.
Upgrading me would bring out my full potential and I would work hard to make up for it, by contributing to the forum as much as I can.

Thanks in advance OP ?

Hi, first off I'd like to say thank you for hosting this giveaway.

The reason why I think I deserve the upgrade is because I have spent majority of my time on HF helping members with whatever it is they require, I also have hosted a few giveaways in my first month and a half on HF. I have also amounted 600~ posts within a month and half most of which is attempting to help members or joining in on conversations.

If you would check my rep, I have 0 neutrals and 0 negatives, and most of the positives are for either helping people or giveaways.

Overall, I think I deserve the upgrade because I am an active, helpful and kind member who isn't afraid to admit he's wrong and also someone who is dedicated to this forum.

Thank you for reading.

I've decided to take a new path in life from the one I was already on. That being said, I want to start fresh and anew with a different source of income but still help out the section I'm currently the most active in. Most of my posts from some time ago got deleted when the 25 prestige rule dropped in for the Philosophy section, so that's a 'meh' speculation from me. Hopefully I win so my inbox wouldn't get filled so easily. I spend the majority of my time on HF to help members most of the days.

V17HUU - *June 23, 2015, 11:46 am*
I remember thinking to my self how good it will be to know how to hack so step 1, for many people like me was Google where I searched hacking forums and HF came up. You can always rely on Google to help you. Anyway I joined thinking I'll come outnas a 1337 hacker xD, 1 year later...
I have been on HF for almost a year and it is absolutely fascinating and mind blowing how much I have learnt in less than 1 year. I also had some great opportunities such as work as a helper for vDos stresser, and of course some life lessons been scammed on HF too last one which was like $80. At the start of HF, I guess everyone called me a LQ user and I would beg people to do stuff for me like crypt my RAT or give me free installs, but eventually I started adapting to the community and learnt how annoying it is. I have overcame what I used to be and I think I am a HQ user, now that I have been approved for uber too!. The fact that all I wanted to do learn was hacking when I first came on, but despite the name being HF its not only about hacks there are !millions of other things too such as games, discussion talking a place to share my stories. A place for me to ask peoples opinions on. It was home, not just a place of knowledge.

It is a great community so much learnt, so much more to learn and it's a great forum with multiculturalism not just Americans, or British there are a fair number of Asians too, which makes many more people feel accepted.

So what I will do if I had uber

- It will allow me to trade a bit more easily without getting scammed
- I will look to do giveaways like this in the future so it doesn't end with just 2 people getting Uber but more than 2 getting uber.
- I will be helping people out way more as I can now be able to comment and make threads and etc in nearly all parts of the forums
- I can +3 rep the people who deserve it so I'm not restricted to just 1 +1.

I really hope I do get upgraded to uber due to payment reasons I am not able to upgrade my self.
Hopefully the person who is most deserving wins it :)
thank you so much for the giveaway OP. 1 day I will follow your footsteps :P

I would like to win this, because I am an old school member, I have helped multiple people with stuff they needed help with, I have always been a trustworthy person, never scammed anybody(although I do have a report against me from somebody who scammed me).

I personally don't feel like spending money to upgrade an account to L33T or Ub3r, although I did get approved for Ub3r a long time ago and then it got revoked, because Omni got mad and he repfucked me.

I have been coming and going on this site since pretty much the beginning, sometimes I am active for months, or times I just forget what the site is called and I move on(trust me, this happened more than once a view years ago).

Anyway, thanks for the contest and may the best story win.

Hello,

first of all thank You for this awesome giveaway. This is a great opportunity for some of us who do not have money at the moment. So I joined Hack Forums because my friend invited me here. It was a new experience for me, a lot of people who are interested in computers at the same type. I learned a lot of new information here and I liked it. This is the only site beside Youtube I'm visiting daily. We can discuss themes of all kind here. I got interested in programming and I'm learning PHP now. It is hard, but I think it will pay off one day. I am helping as much as I can as person with not much funds to do money type giveaways. Anyway, I would like to be on the blue side because of all the features it gives such as Trust Scan and more to come. I am searching for summer job so if I do not win this contest, I will try to upgrade and host upgrade contest(s) by myself. Again thank you for this chance and good luck to all of you. (See you sooner or later on the blue side OP (:)

Been here on forums for 7 years now, I think HF is full of opportunities and great people and it helps me make money, and with l33t it would open even more doors for me to make my sales and support my family with money I make from. Its been a long journey and it was worth all those 7 years here and thank you for this great giveaway. It really helps us less fortunate members.

Chinx - *June 24, 2015, 4:45 pm*
The main reason I would like to win the L33T upgrade is because of the benefits. Such as posting in the SSRP section, I really like that section & would love to debate with a few users who just aren't ignorant. That's my reason though, not going to make up a whole bunch of excuses of why.

Thanks for the opportunity OP !

Hey I saw this post and would like to apply :D

I as you can check in my trust scan have been approved for UB3r. I would have bought it myself but I recently dumped my bitcoins. I am pretty active on the forum and try to stay HQ in all of my post. I mainly would like UB3r to be able to post in current areas that are restricted for the user group.

Thanks for the contest OP :D

Why would I like to have Ub3r?

I'll tell you why, I'm honestly wanting to look into HF more and contribute more as I'm planning to. I got approved a month ago and haven't came up with the money at all. I'm trying to work on a few things before I manage to go forward with contributing and giving back to the community. I've got plans, but I'm waiting a bit on that till I get upgraded and join the wonderful blue side. It's not like I need it need it, but I've been craving the ub3r upgrade for a while now and the suspense is killing me because I can't afford it yet. So I decided why not try my chances in winning an upgrade.

Have I made any contributions yet? No I haven't but I do plan to in the future. I'm focusing more on my new job (IRL) and getting more active on HF during when I get home from work.

This would be a huge step in my time being here but I'd like to take my chances.

Thanks for this opportunity of being in this contest.

I want to be upgraded to L33T because I know I have a lot to offer to this community. I am coding a C++/ASM polymorphic crypter with 9 different encryption types and ARGB steganography, and wish to sell this product once I have finished coding it. That is why I created this account, to sell my products at some stage. With L33T I will be able to post marketplace threads, and I will also be a little more trusted in the community which I believe I deserve. Thanks for this giveaway by the way Cetric :)

I think I would great for an ub3r upgrade because not only have I been approved already, but I've been helping out as much as I can around the forums. I've been a member for some years now and have built what I consider a good reputation, no scams, no bad blood, aside from a few disagreements that led a (-rep) being left against I've been a pretty accepting and stand up member here most because I enjoy hackforums a lot. I've been reinvesting most of my money in hopes to be able to make a living from online income however I'm far from my goals. Hack Forums has helped me get this far, and I couldn't more thankful, I would love to be ub3r so I can expanded into some other Sections and work on other ways to help other the community.

Why do you deserve L33T?

First of all I don't actually think I deserve L33T that much as anyone else do, but I do think I deserve it a little bit. So why do I actually deserve L33T? I deserve L33T because I've been helping people rating graphics, and via PM I even donated a few dollars to some people who was in need of it. I haven't made any threads yet, due to because I'm new and my friend advised this forum to me, the reason he advised me to this forum is because I asked him do you know any good forums that has a section about coding etc and that's how I got into HackForums. I also want to be L33T in order to +1 and neutral people that deserve it. The reason I also want to be L33T is because I want to edit my posts and close my threads, I also want to be available to make a thread in the "Member section". I might be new but I actually have some skills and I will come into that later. If I can get L33T I will get the abillity to change avatar and pretty much everything else, such as the Private Message limit.

What is your currently skills online?

The best thing I love to do online is coding and editing. The programming language I know so far is C++ and a little bit of Java, I'm currently learning Python. When you learn C++ it's easy to spot once you get the hang of it learning it took me a while (11 months), I know that's long but believe me I had fun while learning C++! The skills I have is not only coding but a little bit GFX such as making HQ texts and 3D texts with Cinema 3D & Photoshop. I also edit videos with the program Sony Vegas 12 Pro. What I spend my time on after college is actually homework , coding , gaming (a little bit) , editing videos. The first thing I do is always homework since that's the first priority for me. HackForums helped me very much learning a little bit of Python, there is some source codes some people made I learnt a few things of them, I really do appreciate to be on HF. And that's the basically skills I know of and that's the thing I wanted to write. ?

Which section are you most active in?

The most active section I believe it is the section "Graphic Rating", I lately got into graphic designs instead of coding so I believe it's that section I'm most active in, I'm not sure since I can't see my active posts. I also got a little bit into making OG emails and sell them, and that's why I made some posts at "Appraisals and Pricing"

Anything else you would like to add?

First of all this application was meant to be enjoyed, so I hope you've enjoyed it. I would like to write to you that this is very kind of you making such a nice contribution back to the HF community. I'm new and I've already experienced nice people here on HackForums and the best lovely section for me, of course the coding section <3. Thank you for this, even if I don't win thank you. I wish everyone good luck! ?

I actually want a couple of members to win it more than me, and such a selfless mindset is hard to spot these days.

Why do you deserve L33T?

First of all I don't actually think I deserve L33T that much as anyone else do, but I do think I deserve it a little bit. So why do I actually deserve L33T? I deserve L33T because I've been helping people rating graphics, and via PM I even donated a few dollars to some people who was in need of it. I haven't made any threads yet, due to because I'm new and my friend advised this forum to me, the reason he advised me to this forum is because I asked him do you know any good forums that has a section about coding etc and that's how I got into HackForums. I also want to be L33T in order to +1 and neutral people that deserve it. The reason I also want to be L33T is because I want to edit my posts and close my threads, I also want to be available to make a thread in the "Member section". I might be new but I actually have some skills and I will come into that later. If I can get L33T I will get the abillity to change avatar and pretty much everything else, such as the Private Message limit.

What is your currently skills online?

The best thing I love to do online is coding and editing. The programming language I know so far is C++ and a little bit of Java, I'm currently learning Python. When you learn C++ it's easy to spot once you get the hang of it learning it took me a while (11 months), I know that's long but believe me I had fun while learning C++! The skills I have is not only coding but a little bit GFX such as making HQ texts and 3D texts with Cinema 3D & Photoshop. I also edit videos with the program Sony Vegas 12 Pro. What I spend my time on after college is actually homework , coding , gaming (a little bit) , editing videos. The first thing I do is always homework since that's the first priority for me. HackForums helped me very much learning a little bit of Python, there is some source codes some people made I learnt a few things of them, I really do appreciate to be on HF. And that's the basically skills I know of and that's the thing I wanted to write. ?

Which section are you most active in?

The most active section I believe it is the section "Graphic Rating", I lately got into graphic designs instead of coding so I believe it's that section I'm most active in, I'm not sure since I can't see my active posts. I also got a little bit into making OG emails and sell them, and that's why I made some posts at "Appraisals and Pricing"

Anything else you would like to add?

First of all this application was meant to be enjoyed, so I hope you've enjoyed it. I would like to write to you that this is very kind of you making such a nice contribution back to the HF community. I'm new and I've already experienced nice people here on HackForums and the best lovely section for me, of course the coding section <3. Thank you for this, even if I don't win thank you. I wish everyone good luck! ?
This guy right here, this guy helped me so much <3.
i needed some help with designing, and he added me on skype, and we designed things together, he even helped me code a little, every time i have a error, he helps me and solves it.
This guy is a good friend to, he is my Bro,
And by the way, i really hope you win the contest Olivia. ?
You deserve this.
