ktmrider530 - July 21, 2009, 7:12 pm

If the feds are monitoring it, there is no way to do it without getting caught.

Anti-Social - July 21, 2009, 7:28 pm

new007 - July 23, 2009, 9:37 pm

one thread for just one pass changed account !!!!!!!

sucks with 3 pages

DickFitzwell - July 23, 2009, 10:45 pm

wtf... why would you ever change the password

it works out better if the owner still has access to it

I wrote a tutorial about this, if the owner has a chance to square it away with amazon theres less of a chance of it being reported.... AND it also lowers the odds of him knowing that it has been compromised

with amazon you can even remove the list of recently viewed items
