Good job bro! Keep it up! Will be getting a server this evening :D

gaurav56 - February 14, 2011, 11:32 am

i have uploaded shell on one site most of folder's chmod is 0755

any way to bypass chmod :D

Do You have "2.6.18-194.17.1.el5 #1" Root Exploit ?

3Secounds2Run - February 14, 2011, 11:34 am

we can see the website lol :D

its zoukout.com

you didnt fully cencore it :).

But Greast job !

I'll always think of how you guys are doing it but ill never succed at it ><"

i'm just new from hacking & i'm still looking for working exploit for this kernel 2.6.18-194.17.1.el5
because the server is secure php disabled functions, i can't use netcat, cgi disabled.
