Thread: [\[TuT\] SSH into your iDevice \[TuT\]](#)

lolzor60 - February 14, 2011, 2:37 pm

Introduction

If you're completely new to jailbroken iDevices, modding and stuff like that, you probably don't know what SSH is.

When you SSH into your iDevice, you can basically look at all the files in your iDevice, from your computer.

This includes the files of your apps, themes, and so on.

It's a nice way to get rip images from your iDevice to your computer, and can also be used to get ideas on how to make cool themes and so on.

Lets get started!

Requirements Jailbroken iDevice

A USB cable for your iDevice

What does this tutorial contains? How to prepare yourself for SSH

What to do next

The SSH process

Conclusion

Preparations

First off, download this program called iFunBox. [Download Here.](#)

Plug your iDevice into your computer.

Open iFunBox.

What now?

If you've done the previous steps correctly, you should now have iFunBox opened.

It should look like this: Spoiler [\(Click to View\)](#)

[img]http://img713.imageshack.us/img713/6817/ifunbox.jpg[/img]

Lets SSH!

First off, I'll explain this by text.

Second, I'll explain it to you, by some screenshots.

Look for "Raw File System" in the bottom right corner.

Click that one.

Here's alot of folders. Every folder, is containing some stuff which is located on your iDevice.

From here, mess around, and check out the stuff you wanna check out.

Screenshots

Spoiler [\(Click to View\)](#)[img]http://img694.imageshack.us/img694/3137/rawfile.jpg[/img]

Spoiler [\(Click to View\)](#)[img]http://img511.imageshack.us/img511/8942/rawfile2.jpg[/img]

Common/Populare folders

Themes

Raw File System > var > stash > Themes

Standard Apps

Raw File System > var > stash > Applications - (Pre-Installed Apps)

Custom Apps

Raw File System > var > mobile > Applications - (Apps installed by you)

Conclusion

You've now learned to SSH into your iDevice.

It is very usefull, epspecially if you want to get into modding and stuff.

Fot themers, this is a must.

Please ask, if you got any questions.

Love you :)

HQ tutorial.

Zniper555 - February 14, 2011, 4:44 pm

Great tut, very detailed. BUT this isn't actually SSH, this is just using a iDevice file browser. SSH is actually using file transfer methods over a wireless network through use of a program such as WinSCP (Windows), or CyberDuck (Mac); no physical connection to your computer is required. Nonetheless a very helpful TuT

Nonetheless a very helpful TuT Oh, my bad.

Thanks for notifying me.

Will edit when I get home.
