Thread: Website with 200k unique daily visits. Need ideas

Che Guevara - *October 30, 2015, 10:02 am*
Hello,
I have access to a website with 200k daily traffic, the 200k are unique hits. I would like to know how to monetize them? I am most likely trying to find out how to use them in social media somehow? Like providing FB likes by infecting them with something etc?

Looking for some good ideas!

where does the traffic come from?
depending on that you could sell them different things

If you really wanted to, you could put an iframe on the site and exploit every user that visits the site with an exploit kit which would probably result in thousands of fresh loads lol, or sell it as traffic for other users.

Add the website to google adsense and you will make around $1000/month.

Man!
There are so many option
CPA, Affiliate, PPD, Adsense, Adf.ly
PM me if you need some sort of help.

Using a site like this for hacking would ruin the whole thing and make it useless.

That would make a minimum of $100k a month if you know what you're doing with AdSense.

But I really doubt OP has 200k UNIQUE visitors per day. I may be wrong though.

I have never used Adsense so if anyone could guide me how to I'd greatly appreciate it !

I don't think that there's a niche that can make you $1 per 10 visitors.

In order to profit off it for the long term, I would do the following:
*Find out what country the admin(s) live in
*Put any kind of ad while not showing it to this specific country

Good luck.

Good luck.I know of niches and countries that make £0.80-£1.00 per click.
2% CTR each day on 200k visitors at lets say £1.00 per click (maximum) = £4k a day.
And i have methods to take the CTR to up to 10% without getting banned by Google.
4 x 5 = ?
You do the maths.

I would teach you how to use adsense and I could help you get more likes on your FB page if you wish? PM me and I'll send you my Skype so I can walk you through it all or XMPP if you wish.

HappyHobbit - *October 31, 2015, 12:03 pm*
so how do you monetize your website now ?

Che Guevara - *October 31, 2015, 12:04 pm*
It is not my website, I just have access to it. I am thinking about Adsense but I see some people say

it's not the best idea.

You do the maths.Still sounds unlikable at higher amount of traffic but it's not something we can really argue about and it's all only theoretically.

I suppose you're talking NSFW topics. AKA Black Hat. I wouldn't suggest talking about which here. Have a nice day ?

Gather data by redirecting them to an opt_in page and then mail them and turn them into profit.

You could get a script that pumps your facebook page full of likes.

Che Guevara - *November 3, 2015, 2:55 am*

What about mylikes.com? Could we use it somehow to get clicks without the visitors knowing?

Raymond Reddington - *November 3, 2015, 2:57 am*

Are we talking about facebook or something?
