Thread: [\[List Cydia Repos/Sources \[List\]](#)

lolzor60 - February 15, 2011, 4:17 am

Repos/Sources?

A Cydia repo, is basically a library for Cydia, which contains packages. When you install Cydia, you get some standard Repos, which is already installed. I'll show you a big list, of custom repos you can add to Cydia.

How do I add repos to Cydia?

Simple, open up Cydia.

Look at the bottom of your screen. There should be something called "Manage".

Click that one. Three options shows up now. Click sources.

In the toppe right corner click "Edit > Add"

Now, you can add the repo you want!

The list

Code iFonetec: <http://app.ifonetec.com/cydia/>

BigBoss & Planet-iPhones: <http://apt.bigboss.us.com/repo/cydia/>

Very well written. I hope to see more from you in the future :)

IDon'tExist - February 15, 2011, 10:11 pm

you should add iRepo.us to the repo list

lolzor60 - February 15, 2011, 10:42 pm

Thanks for the comments.

Will add iRepo when I get home. Thanks

Breakbeat Junkie - February 16, 2011, 12:23 am

Looks good. There is already a thread on this tho :)

Always good, with some new ones though :).

Dark_Skript - March 13, 2011, 5:31 am

Thanks for this. All added to my custom IPSW :)

lolzor60 - March 13, 2011, 7:21 am

No problem mate.

Hope you can use it for something :).

"Anonymous-J" - March 13, 2011, 12:53 pm

Very informative, well done!

I'd just like to voice my concern, that adding multiple repos, will cause Cydia to be dramatically slower and can increase the chance of repo/connection errors.
