These aren't in 4k, these are 800 x 450. You're looking for someone to upscale them to 1080p?

Quite unlikely that someone can do this for you, you'll lose a ton of quality.

Scale it with gimp. It's pretty easy...

Chrylix - *December 8, 2015, 8:20 am*
Here's what it would look like scaled up, feel free to use them if it's good enough for you.

Ayahuasca - *December 8, 2015, 8:21 am*
Oh god the pixel stretching... why...

Because scaling up stretches pictures lol. Scaling down is fine. Up? Not so much.

The ones I posted are the original files, OP had smaller ones from another source
