Solvers:

M4RKZ

You just have to use your brain.

There isn't any connection to MYSQL, so no SQL Injection! You have to login in another way as admin.

nacker - February 16, 2011, 3:40 am

I wasted 2 min on it, than I read the page and got it in less than 1 min. Is quite similar to one chalange on "hackthis site" website I did few years before.

UnknownAX - February 17, 2011, 5:14 am

I've got password but as you said you need login as admin.

I just want to check the admin's name is 'bill' and I have a feeling it's something to do with cookies, wrong or correct?

The admin name is "admin". You are close to the solution if you already find the admin password.

Not Accepted on HF - February 18, 2011, 4:34 am

Simple code used has to do with this: I will not tell you where to inject this code or how to use it Figure it out its a hint.

javascript:document.body.contentEditable='true'; document.designMode='on'; void 0
