Who we are
Lion's Neck is a product created to fulfill a need for a trustworthy, user focused, competitive cheat.
Every feature we developed is designed so that there is no complications or clutter. The optimal settings are set the moment you start and with a responsive rapid menu, you can customize the cheat to suit your needs.

Security
Our team of developers have personally reverse engineered every bit of Valve Anti-Cheat to ensure that our product is and will always remain secure.
As proof of our commitment to security, we have publicly documented the analysis of VAC module for anyone to confirm.

https://hackforums.net/showthread.php?tid=5085827

Security is a major concern for us and we would never sell a detected cheat.

Plausible Deniability
Since the implementation of Overwatch, we have added pseudo randomization to our Aimbot and have developed a humanized Recoil Control System.
When holding your aimkey, you will notice distinctly that there is no snapping or inhuman recoil control.

Support
If a problem was to arise, we provide 24/7 support to get you up and a running in minutes.

No Risk
Is our cheat not for you? Absolutely no problem.
Simply send us a PM within 24 hours of purchase and we will refund every cent, including Paypal fees.

We have given out dozens of refunds and we refuse to keep your payment unless you're completely satisfied.

Purchases
Once purchased, your subscription will immediately be applied automatically.

It can work with some other anti-cheats, but we mainly focus on VAC.

disclaimer: i'm not about sale's trashing.
i call bullshit that they are vac ud since they only analyzed 1 vac module except of all like 90% of the providers nowadays.
vac will detect anything if they want to.

Hey isn't this the same website that charged 90$ for pe header removal?

**a living meme** - *December 22, 2015, 3:20 pm*
is this str8 p8st from UC???, show the cheat menu

We have reversed over 18 modules. The threads linked are the published results of 2 scans from one module. For quite obvious reasons we do not publish our dozens of analyses since that information is what makes us unique.

The images are down for a bit since some skid is trying to ddos us.
It's a combination of funny and sad, but more of the latter.

We are still giving out vouchers so if you was to try our competitive features for yourself. Just give us  a pm and we'll set you up with a temp sub.

He believes I am a user he has banned before.
If he is unable to discern that I am not a past user that is ban evading. I will have to retire for this forum.
