Thread: [\[TuT\] How to send an E-mail from any E-mail address \[TuT\]](#)

Core i7 - February 16, 2011, 9:16 pm

SEND AN EMAIL FROM ANY EMAIL ADDRESS!

Heres a quick and easy tutorial on how to send an email to anyone from any email address.

Step 1) Go here http://www.gta-parba.yc.cz/meil_fuck.php

Step 2) Type in the E-mail address that you would like it to appear its been sent from.

Step 3) Type the E-mail in which you would actually like it to send to.

Step 4) Type your message that you want to be contained in the email.

Step 5) Send it, it should bring you to a verification page and have you verify your message with one of the letter verification things.

*note some parts of website are in different language.

Credit to (Sponge) for finding the website

Good post.

I think ive seen this before

Fear is 1337 - February 16, 2011, 10:21 pm

This just gave me a really good idea.

Coton Pker - February 16, 2011, 10:35 pm

This is the method alot of people used to send html emails from "official websites" to steal people's game accounts :p
for multiple games.

I think me and you are thinking the same thing hahah

Maradonnie - February 17, 2011, 1:59 am

I`m gunna hack habbo's this way. Only thing is i don't know habbo HTML for email.

iamHotYouAreNot - February 17, 2011, 2:05 am

Nice tutorial :) . It's good for stealing some accounts from noobish people :D

sanboju - February 17, 2011, 2:29 am

haha new way to threat :P

Core i7 - February 17, 2011, 9:09 am

yes very good way to do devious things :p

traponline - February 17, 2011, 11:09 am

I tried this one, Nice one it goes to Inbox not to spam ... thnk u ?

PiraX - February 17, 2011, 11:10 am

Or you could use the PiraX Email Forger located on my site...

If you want it, just click on my signature (it will take you to my site)

I see it's a very good one.

Tnx for making it.

But it doesn't work for gmail
and puts it to spam folder on yahoo.

Also the OP's method doesn't work.. at least for me.

tnx

edit:

gmail seems to put the mail to spam if it has "facebook" in subject..

since I removed the facebook in subject works GREAT now!! thanks!!

mahz - February 23, 2011, 12:51 pm

Thanks for sharing this i will try that

t_griffs - February 23, 2011, 1:23 pm

Thank you very much IRONFI3LD, this is very cool.

DFTCHE - February 23, 2011, 1:25 pm

Thx I hadn't seen this before.

monkeyapa - February 23, 2011, 1:57 pm

Thanks but the site doesn't load :O

edit: was proxy error, works now

monkeyapa - February 23, 2011, 2:13 pm

Also works with <http://emkei.cz/> and <http://www.anonymailer.net/>

Not trying to hijack thread or whatever, just a tip since the site you mentioned seems to be unstable.

L3o4Nn01 - February 23, 2011, 2:35 pm

Thanks monkeyapa , this work much better !

^^

KevinHouse - February 23, 2011, 2:40 pm

This is just 5 lines of code >.>

There are more things to do with php then mail()

monkeyapa - February 23, 2011, 3:19 pm

But some people don't know anything about coding ;)

Core i7 - February 23, 2011, 4:53 pm

Thanks guys yeah this makes it very easy to do some devious things.

Dreek Lass - February 23, 2011, 5:03 pm

Ironfi3ld, would you happen to know a spoofer which sends to the inbox and has the html feature? I cannot find a working one anywhere.

Yeah heres a link, <http://www.anonymailer.net/> its in the bottom right it says HTML.

monkeyapa - February 23, 2011, 10:20 pm

Does anyone know how to pass the spam filter when sending to @hotmail.com?

Jare - February 24, 2011, 1:03 am

Not sure how it works, but it is genius. Some guy tried to recover an account from a certain website cough and I sent him an email saying recovery failed, and blocked the sender afterwards..

One thing that it lacks is HTML/Pictures, as most legit emails such as steam/paypal have pictures in the emails.

Like I said before this link right here <http://www.anonymailer.net/> will do html its in the right hand corner.

sad rawr - February 24, 2011, 10:24 am

EPIC!!! this might make stealing facebook login info easy :P

because you can input some html and on of the above links and include the link to your virus.

t_griffs - February 24, 2011, 7:15 pm

This could be helpful. Thanks

ju7i3n - February 24, 2011, 7:45 pm

No problem guys, glad it helped, and not sure on the hotmail how to get it out of the junk.

Special™ - February 28, 2011, 5:58 am

Can somebody send me the script?

ebonie101 - February 28, 2011, 10:04 pm

it goes to junk in yahoo, but yeah it works :) thanks

2b7 - February 28, 2011, 11:05 pm

Do you have any mailer that sends to inbox?

?Kreedz?™ - February 28, 2011, 11:36 pm

This is a spoofer email right? and goes in inbox?

syedabbas87 - March 1, 2011, 1:44 am
