Thread: ["The Gamers Crew" Sub-Forum?](#)

Am I the only one, who can acces "The Gamers Crew's" sub-forum, even when I'm not in the group?

Just wanted to know if this is done on purpose, of if it's a bug.

Have a nice day.

It's not a bug, everyone can see it. You need to be in The Gamers to post in it.

I thought the same thing as well. Until I tried to post in it then realized I had to have special features to post in it. xD

Yup, you can view it, but not post in it.

I think it might be a better idea for it to be hidden to non members.

They've made big cuts to the members of the crew.

Yup, they removed everyone and started over.
