Thread: CRACKING TOOLS ARE FOR SKIDS, AND I WAS ONE FOR SELLING A SKID TOOL

Disparity - *January 31, 2016, 7:52 pm*
Can't believe I opened this product. Hate the skids that use shit like this.

The story behind this is as follows:

I'm a broke student and am trying to make it in the marketing world on HF. All fine and dandy. However, I fucking hate RATing/cracking skids. I CAN'T FUCKING BELIEVE I CATERED TO THAT AUDIENCE. I'm fucking disgusted with myself over that. My own morals are my main priority and guideline and I fucking smashed them selling this.

My apologies to Vellichor in particular, and thanks to How2Hacks for being honest.

As much as I despise the skids that use tools like this, I'm releasing it publicly. Check my threads to find it. Enjoy.

Does Starbucks and amazon work? Which configs are proxyless/require proxies?

Please let me know i'm interested.

They should both work fine, and all configs should be used with a proxy. If you want a list of which ones work without proxies I'll contact my developer.

Is a very good piece of software, would recommend to anyone looking to get into someones account.

Pretty sure you do not have permission to sell this considering it was never Scorpions project to sell to you. Anyway I have the source files to this and it actually is not the best. I'll be more than happy to release all files for free so everyone can see that it is not worth $20.

Facebook locks accounts after 20ish or so trys and changing IP's wouldn't matter it locks via the username and you said you're not the developer so the facebook functionality should be removed from the program unless it works via some private API without lockouts?

Disparity's in the scamming skid game to now.....
Dr.Watson release this please :)
anyone considering buying this , dont you arent gonna crack anything with it...

Do you have any evidence to the facebook lockout thing I mentioned? if it does lockout disparity should mention it or else its false advertising.

You're fucking right. Fuck this. Can't believe I turned on my own morals.

Updated the OP. Releasing this shit for free.

I wrote a long nice poet for you. You'll get it with my XMPP.
I'm beyond curious what happens now. How do you proceed from here? How will you turn out to? Oh the questions. The mystery. It's fun.

No, it was through my own devices. I started talking to him again though, and he reminded me.

If you're going to make it in the 'marketing' world. Hackforums is not the audience for you. Why don't you run 3-4 websites that target 'multiple audiences' advertise it via social networking, email extractors, blogs, forums, and then slap Google advertisements on it.

Offer services on your forum, that make people pay memberships. Have high quality content so you're marketable on Google...

If you need help, I will show you the way.

Open up a eCommerce site and then sell your work...
