Thread: TURN USELESS SMARTPHONE INTO WIRELESS SECURITY CAMERA

priyanka11 - *February 22, 2016, 6:50 am*

Turn your useless Android/Iphone Smartphone into wireless security camera:

If you update your outdated gadgets as much as I do, you probably have a small collection of older devices with very low resale value lying around it. Don't toss them or sell them on Olx/Quickr. If you don't already have an integrated wireless security camera (or if you hate what you have), you might find that your old smartphone is the key to wireless security cameras which means you can Turn useless Smartphone into wireless security camera.

I update my phone every two to three years, and I think I'm fairly average in that regard. And compared to a lot of people, I'm actually way behind the curve. Some of you crazy people update every year! I try not to update unless my phone is so freaking slow that watching paint dry is more entertaining than flicking through its menus. But still, it has been eight years, and now I have two Android and one IOS Device. By the time I use these devices I asked myself a question: was it finally time to ditch my iPhone and Android phone?
