Could I have a vouch copy ? I'll write a HQ review.

Contact me on skype: max.tiwin or in pm

I got a vouch copy to review and here are my thoughts and honest opinions:

This eBook has pretty much every method I have seen already. There is nothing very unique about this other than the ultimate version which has a custom webpage. For the amount of money that this is worth I honestly don't think it is worth it. Most methods seem very saturated.

Could I have a vouch copy? As I have a lot of experience I'll write a HQ review!

User has sent me a copy of this Ebook. I must say he put a good amount of dedication into writing - formatting - and setting things up with this Ebook. I highly recommend it and give an enormous vouch for it! ?

I have received a vouch copy for this E-Book and here is my honest review.

Grammar: 10 | 10
Most people don't care about this. But in my opinion this is a good indicator to see how legit the E-Book is and how much effort the autor has put into it.
I have read several times through the Book and have not found any single grammar related issue.

Layout: 9 | 10
This E-Book is well organized and graphically impressive too. Also this shows that the autor has put a lot of effort into it.

Orginality: 8 | 10
Natani included some basic methods in his E-Book, but you can still have a lot of success with them. Other methods are quite unique. Really interesting and useful in my opinion is the 'Custom Spreading Webpage' of the Ultimate version. I have never seen this in a E-Book bevore!
!!!This is just the first released version of the E-Book. Natani will update it and add more unique methods. Therefore I will update this review too and I'm pretty shure I can give him more points for the originality then!!!

Overall: 9 | 10
This is a HQ E-Book. It's easy to understand and you will make many installs if you follow the instructions!

I'm interested of your ebook but can I ask why you want to buy updates from other user if you have so good spreading method?

Buying from others will make you get the clients in a second. This method wont get you 400 clients in a second.
