Thread: don't buy bustabit scripts/methods

Junx - *May 2, 2016, 3:09 pm*
Every single script people sell is public and if they made it then it wont be much different from a public one.

A simple google search resulted in this for me.

Don't waste $15 on people reselling public scripts.

People will still sell ebooks with "methods".
The only method in bustabit is don't bet while there is a rape train.

Been running a public script for 2 days now and have not lost 1 bit.

Just like OP's script, it in no way shape for form perfect. It is completely random. And you said "Been running a public script for 2 days now and have not lost 1 bit." You have lost in your screenshot???
Lost and gained back as you can see. Hence why I have not lost anything that I've put in since the script will win back losses easily. Hence the big jumps.

JewishMan - *May 2, 2016, 3:11 pm*
The script really should not be needed, manual bets are the safest.

Egregious Jr. - *May 2, 2016, 3:13 pm*
I used the one @Pittinger showed me, it's free and amazing :)

You may not have gone under your initial amount of bits but you certainly have lost bits. There is no script that can guarantee no loss, it can only do that if it knows exactly when the game is going to bust.

Public scripts do bust you need to have a pause script like I am selling this bypasses every rapetrain.

Here is my new profile on a 2 loss setting

I made an mistake on game 226 as the multiplier was slightly short so I put in 2 manual bets that lost, but soon recovered it back.

why do you keep manual betting? you seem to lose EVERY manual bet, as soon as your chart goes red you tell us it's a manual bet

This is because its a 2 lose method I am using on this account ATM the 3rd bet can be manual or you can just leave it and go back to your basebet.

Gambling is gambling sooner or later you'll lose (not saying you will) you may lose a little or a lot. But yeah some free scripts are better than paid ones.
