A brief description of Appredeem.

Spoiler ([Click to View](#))

"Who We Are

AppRedeem was founded in 2010 by App Developers who designed a great new advertising platform for mobile app discovery, branding and monetization. We are constantly working towards building tools to help fuel the growth of the mobile marketplace and to provide the exposure you need. We are backed by top-tier VC firms and we will continue to implement great new ideas with a world-class team.

What We Do

AppRedeem offers Advertisers the most cost efficient platform for advertising mobile Apps with our new App Discovery 'Real Rewards' system. We give Advertisers and Mobile Developers access to 'All' of our members. AppRedeem members receive points for trying Mobile Apps and then redeem points by giving feedback to 'You' the App Developer, creating a level of engagement that produces many new loyal customers.

With AppRedeem, Advertisers big and small can reap the benefits of a high ROI while receiving valuable feedback from a new customer base. Our unique Pay-Per-User model guarantees members will use your mobile app and suggest improvements as an additional bonus. We make it simple for you to reach new customers and view the results using our AppRedeem Mobile Analytics. We are passionate about what we do and how we can help you succeed when you advertise your mobile applications with AppRedeem! "

http://appredeem.com/about_appredeem.php

In this thread I will only explain you how to earn with your idevice. (iphone, ipad, ipod touch etc.)

The guide:

Spoiler ([Click to View](#))

1. Open Safari or any other browser you prefer on the device.
2. Enter the following URL in your URL bar <http://bit.ly> [WARNING: potentially infected]/e6UcKh - U and K has to be in capital letters.
3. Now register with the same email you have on your PayPal account. Why?. Because it's the email you sign up with they will cashout to.
4. After registering, you will be asked to install AppRedeem's application on your device. Do that by following the little instruction you get on your screen.
5. After installing Appredeem, the program will navigate you to your first free application offer, so that they can verify you and so that your account can get activated.
6. Now you've installed your first free application, now open up the application and browse around in

it for a while. you will get your first Appredeem points on your account within a minute.

7. Now open up appredeem, and rate and comment the app you just downloaded to get the actual points.

After that, go to the Apps bar and search for more app offers.

8. Now when you have around 50 Points, You can cash-out for the first time.

You can choose to get paid 0.50\$ to your PayPal account for 50 Points.

Or you can choose many other offers.

I won't list them all here.

Tips & info:

Enter the name "danbirk" (without quotations).

In the "Enter Bonus Code", which you can find under the "Apps" tab.

That will get you another 25 points.

100 points = 1 \$.

Their PayPal cash out system works like this:

You get 0.01\$ per point you have.

So let's say, that I have 256 points, that will let me cashout a total of 2.56\$.

This means you can cashout all your points at a time.

No matter how many points you have.

But you need to have more than 50 points.

Proof of payments. And pictures of my total earnings with AppReedem.

Note that this is before their update.

Nope i didnt took my tutorial from anywhere, i made it myself, after seeing a vid on youtube with the method, then i decided to write a guide.

I dont care if any other person has written the same guide, i find it usefull, and i can see that other people do too.

And no, its not the same vid that the guy linked in his vid ;)

Wrong? You NEED a number/phone number (mobile phone) after you get your \$00.15 (first payment).. If you try google voice or something and it fails, you get locked out. It tells you to contact support but i still haven't heard from them since.

You will see how much you have earned in the top when launching AppRedeem.
And if you havent registered with youre pp email you will not get any payments.

DaKnOb - March 2, 2011, 6:37 am

Because of all the people who ask the same thing for over 9 pages, here's a FAQ!

I don't get paid!!

Make sure you've downloaded the application and OPENED it!

I downloaded the app, opened it and waited 1 minute, but I didn't get paid!

Make sure you're registered with your PayPal e-mail and not with a random e-mail!

I installed all the available apps, now what?

Depending on the country you are, you will get new apps after some time. For U.S., it has a lot more apps per day, while for other countries, you got to wait up to 1 week or 2!

Falconw0w - March 2, 2011, 6:37 am

i hav registrd wid my pp email id only ! Lets c . Il wait fr smtime.

danbirk - March 2, 2011, 6:46 am

Thanks to DaKnOb for the little FAQ.

And to nidhish91.

You should get payments 1 min after opening the app.

I explain it in my guide. but during signup, there will come a little thing where they ask to bookmark there app.

Wich means installing there application.

It should come automaticly during signup.

Okay, as a lot of us have figured out by now, you get 50 cents a referral... And you can get 15 cents per free app, though today I had created another account and earned like a dollar without realizing I had an older account already, they sent me paypal emails and all that. Obviously this can be outsmarted with the right knowledge and I'm trying to work on a method where it's decent payouts but I was wondering if anyone would care to work on it with me.

Jailbreak your idevice, download install0us from cydia and download the pirated games. Or just google "How to download cracked apps in iphone" And, you still get the money. Actually, you can get quite a lot because they usually pay the price of the app and surplus.

P.S. I tried this with a few other sites like this and it works but didn't try it on appredeem.com so I will try and let u guys know.

This method only involves downloading apps from youre idevice.
idevice = ipod touch, iphone and ipad ;)

1. Open Safari or any other browser you prefer on youre device.
2. Go to this link <http://goo.gl/IQkSp> - Q and S needs to be in caps!
3. Now register with the same email as your PayPayl. Why? because its email you register with they will sent you \$ to.
4. After registering, you will be asked to install AppReedem's application on your device.
5. After installing the app will navigate you to youre first free application, so they can verify you and so your account get activated.
6. Now youve installed your first free application, now open up the application and browse trough it for a little, you will get your first 0.15\$ within 60 seconds on your PayPal.
7. Now you can go into the AppReedem's app again, and look for more free applications to download, so that you can start earn.
8. Download every app theres free, it will give you around 2\$ (depends on the daily offers and your country), there will come new downloads available every day (depends on country), so daily you should go and download the new fresh apps.

NOTE: After youre first download you will be asked to verify your idevice with your phone number, so put in your number + your national number, so the national number of youre should be infront of youre number. Examble: 45 12345678 - 45= my countrys (denmark) national number, and 12345678 is my number.

Proof of payments, and how much i have total earned with AppReedem.

Are the apps regularly upgraded only in USA? Cos I live in UK and tried this week ago but app list isn't getting upgraded. One week passed and only 1 app was added worth 15 cents. Or is it because I didn't download all listed apps? Because 2 of them are for iPad, 2 of them don't work and there are quite a few for which you have to pay.

No because you need internet access and ipod classic doesn't have that.

You need to launch the app after installing it, then browse around in it for awhile.

But only if you did everything right, and if you remember to browse around in the app after installing.

Itachi59 - June 26, 2011, 5:21 am

It is not at all in the subject, but as I my life in Europe is the euro currency, so when I win \$ 0.25 on my PayPal account , I have € 0.10... I hate the euro

74170 - June 27, 2011, 12:58 pm

I'm using this on my ITouch, and i don't have to type in any phone number.

Hope that i don't have to :P

I'm using it since today, and i got 1,27 USD.

But n1 tut dude, i just hope that it will work in the future too.

Markdapimp - June 27, 2011, 1:18 pm

when will they add more free apps lol

danbirk - July 5, 2011, 7:25 am

@Bose, you have to wait :)

@74170, yea, In their update, they removed the sms verification shit, im glad it works for you.
