Wanted to focus on the legit players, since there seem to be plenty of bot Discords from what I've seen. Be sure to ask for your team group when ya join.

Snazzy Features

We have Nadeko bot running on this server. Want to get your very own Team role? All you have to do is type one of the following:

.iam Team Instinct
.iam Team Mystic
.iam Team Valor

There's also a Music voice channel, which should contain a loop of the finest Pokemon battle themes for your listening pleasure, and server currency generation is enabled, so you can earn Rare Candies to dick around with in the various features of Nadeko bot.

Hope you enjoy it! I've been fiddling with it all night. Finally got Nadeko bot running locally. (Well, on a Digital Ocean VPS through Mono, but yay! Running EXEs on Linux!)

Editing the OP with some snazzy features.
