Thread: Site Improvements - Loading a LOT faster now.

tim - *September 11, 2016, 6:07 pm*
I don't know what happened, but the site is loading incredibly faster than a couple weeks ago. I like it. Takes literally less than one second now to load, even with many plugins.

I like the optimization.

Lord_Jesus - *September 11, 2016, 6:09 pm*
The site might have been under a lot of DDOS attack, so additional features were added in order to prevent downtime, might be better now, so the system automatically turned off some extra security.

Yeah could be that.

It's possible that Omniscient found the perfect setup though. Cause some sites still load incredibly fast even during DDoS attacks.

Omni does a lotta shit behind the scenes. Probably toyed around with shit.

Cryptic™ - *September 11, 2016, 6:26 pm*
Yeah the site is extremely fast for me right now

minimalist - *September 11, 2016, 6:29 pm*
I'm happy for you, but pages have only loaded once out of my ten clicks :|

J?son - *September 11, 2016, 6:35 pm*
vouch,, website is loading nice and smooth since p1st and apple are MIA

Omniscient - *September 11, 2016, 9:10 pm*
We had so many attacks last month I was forced to make adjustments. Those changes have been extremely effective in not only stopping attack effectiveness but also loading regular traffic better.

It coincides with this thread:
https://hackforums.net/showthread.php?tid=5394059

There definitely has been a huge difference.

Yeah. It actually makes the experience on the forum 100x better. Every post, every PM, every thread, and everything I do is pretty quick. Loving it more than before.

Gary - *September 12, 2016, 5:30 am*

Yeah, I just noticed that too. Like a couple weeks ago shit was taking like 5-10 seconds to loaderino.

Levi - *September 12, 2016, 11:53 am*

I agree, webpages are loading exceptionally fast as are images and other assets.
