Thread: [How to hack with a cellphone Part 2/2 \[Extremely detailed\]](#)

Developer - February 24, 2011, 10:34 pm

If you like my sharing, please post on my scanner service and wish me luck, or maybe you can become a customer as well.

[\[img\]http://is.gd/Go0QAw\[/img\]](#)

4) MMS Spoofing (Sending pictures spoofed)

SMMS Spoofing is somewhat probably the most complicating simply because you don't have many options available to do so and it takes a bit more of work.

What you need to do is create a new e-mail where you can essentially send a SMS via E-mail.

Create an e-mail according to whoever you want to spoof, for example...

Police@Police.com

Once you have a new e-mail, what you have to do is attach the image that you want to send and send it via E-mail as a SMS.

Once you do that, it will go through as a SMMS.

5) Phone calls spoofing (Making spoofed phone calls)

Phone calls spoofing is my favorite of all.

This is perfect if you are the kind of person that likes to do prank calls or simply want to maintain yourself as anonymous as possible.

Stopping spoofed phone calls is virtually impossible. Even if they block the number that you called, you can call again as ANY number and your call will go through perfectly fine.

Now considering that I doubt that any of you reading this is an expert in Telecommunications or electronics, I'm going to give you a really easy form of spoofing your calls.

<http://calleridfakers.com/> - This one is a paid service.

<http://calleridfaker.com/> - This one is free.

<http://www.spoofcard.com/> - This one is a paid service.

http://www.crazycall.com - For more info read [HERE](#)

Let me tell this before you jump into using any of them.

Paid services are more secured because they are less likely to send your phone number to telemarketers who then call you to annoy the hell out of you.

Free services are open to do whatever they want with your phone number, so it's up to you whatever if you want to use it or not.

I personally carry all of them bookmarked on my cellphone's browser for easy usage when I need any of them.

Pretty self explanatory once you visit the websites.

6) Why you need to be Careful spoofing

Let's put it simple. If you didn't already know all this information you are probably very misinformed and inexperienced.

Don't be stupid and target the wrong people that can easily find out who you are.

Using websites like:

<http://www.trapcall.com/>

You can easily find out the phone number of anyone calling using a spoofed phone number or SMS, so be careful.

Don't target anyone of power or the government because most likely they have the money and technology to track you down easily through much more advanced methods that I am mentioning here.

7) Hacking wireless internet with a cellphone

Sorry newbies, but this is where the easy "hacking" ends for you guys on this section since you will have to have prior experience with executing commands on the Linux Operating system.

If you are already familiar with the type of security that there are such as WPA, WEP, WPA SK, WPA SK2, etc...

You will know that WEP is probably the easiest to crack through a bruteforce attack, but usually is a pain in the ass having to wait until it gets cracked.

It's no longer impossible to hack wireless internet through a cellphone.

Here's the proof:

[Video: <http://www.youtube.com/watch?v=IXfGGOa-skA>]

I won't explain in details on how to do it simply because there are already tons of tutorials on Hacking wireless internet on Hackforums, so all you have to do is use the search button if you are interested to learn on how to do it on a computer and then a cellphone.

8) The best cellphone for hacking

I couldn't possibly finish this tutorial without giving a huge vouch for this cellphone. It's the cellphone that I personally own and use everyday. It's the best cellphone there is without a doubt.

This cellphone can do literally everything.

The Nokia N900.

Doesn't matter what you hear on TV about the new and latest cellphone being the "best" it's all lies.

Believe me, I've done tons and tons of research.

Why is the Nokia N900 the best cellphone currently out in the market? Well, this piece of little machine can do it ALL.

Let me mention a few things that I do myself with it.

- Emulation of any console and games
- Free phone calls and SMSs, SMMS
- Wireless internet hacking
- Multitask up to 40 windows open at once and not crashing.
- It runs on Maebo (A linux based Operating system, based on Debian)
- A second phone number using Google's voice feature
- Pretty much everything you can think of, it can do it.

You think your phone is the best? Simply do a comparison with your phone and the Nokia N900 and you will see for yourself that it's the best.

I do not want to praise it entirely because it would take me probably a good 2 days mentioning everything it has.

Just go to Youtube.com and search "nokia N900" and you will see so many amazing things that it can do.

<http://maemo.nokia.com/n900/> - If you are interested in finding out more about hardware and software built in.

Just as I always say, I believe this is everything I have to say.

Good luck and I hope that you learned a thing or two.

All credit goes to me (Developer) from experience and learning.

Part 1 - <https://hackforums.net/showthread.php?tid=1088254>

Please check out my other tutorials and comment.

abhi123 - February 24, 2011, 11:04 pm

nice one :)

Good for the beginneers

djscorpio99 - February 25, 2011, 12:31 am

yea dude n900 is best^^^as i m also owning it...lol

Didnt know abt Injection...thanx for that buddy^^^

VLxKaihoe - February 25, 2011, 2:00 am

That nokia is handy only because of it's qwerty keyboard tbh, the latest desires rape (emulating BT4 and so on).

Developer - February 25, 2011, 12:43 pm

(Feb 25, 2011 03:00 AM)VLxKaihoe Wrote: [\[CITE\]](#) That nokia is handy only because of it's qwerty keyboard tbh, the latest desires rape (emulating BT4 and so on).

The N900 runs on a Linux based distro. You can install Debian and it can act exactly as Linus on computer.

I MIKE C I - February 28, 2011, 4:11 pm

Nice tutorial :). Also, that video on kevin mitnick is amazing (I watched all parts) thanks for introducing me to him!

I've been considering getting a HTC Desire HD for some time now, but after reading this I'm considering the N900. Do you think it is better than the Desire HD? Unfortunately, I can't get the N900 on a decent enough contract for less than £32 whereas the HD I can get it for £25 a month and on a better network. Do you think I should go for the N900? Is there an equivalent phone that was released later than this phone? There aren't as many contracts for this phone since it was released quite a while ago.

Developer - February 28, 2011, 9:40 pm

(Feb 28, 2011 05:11 PM)I MIKE C I Wrote: [\[CITE\]](#) Nice tutorial :). Also, that video on kevin mitnick is amazing (I watched all parts) thanks for introducing me to him!

Is there an equivalent phone that was released later than this phone? There aren't as many contracts for this phone since it was released quite a while ago.

I think that no phone is better than the N900. If my current one broke, I would buy another one no questions asked.

You have to consider what you're going to be using your phone for. It's only for phone calls, SMS, and the basic features I wouldn't go with a fancy phone, however if you plan to abuse practically abuse them everyday I would do with the N900 since it's very solid, plus the hardware and compatibility on the phone is just amazing.

I have dropped mine at least 5 times and since it's around 3/4 inch thick, the thing is almost like a rock. I have gotten liquid on it and it's still running like new.

I know that if I did that to any other touch screen, they would've died by now.

The new year 2011 is still young, we'll see whether if any new phones will be releases. As of now, I give my complete vouch for the N900 all the way.

And you're welcomed. ?

SIM-570417 - February 28, 2011, 10:39 pm

Let me share something for u theunkown

blueftp can call from others phone with bloetooth

my favorite is x2blue for mobile who call by others phone haha lol

er0senn1n - March 9, 2011, 8:27 pm

If your n900 can hack wireless networks, why not make a tut on how to do it?

Nulls - March 9, 2011, 8:51 pm

Thanks TheUnknown01, you always have great tutorials, keep it up!

Developer - March 9, 2011, 9:35 pm

(Mar 9, 2011 09:27 PM)er0senn1n Wrote: [\[CITE\]](#) If your n900 can hack wireless networks, why not make a tut on how to do it?

Because like I mentioned on the tutorial, there are always tons of tutorials on how to do it.

Visit the Wireless internet hacking section on the forums.

(Mar 9, 2011 09:51 PM)Nulls Wrote: [\[CITE\]](#) Thanks TheUnknown01, you always have great tutorials, keep it up!

Thanks a lot for the compliment. It's people's feedback that encourage me to write more and more tutorials.

SIM-676321 - March 10, 2011, 4:01 pm

n900 i get it free on a nokia presetation.

Developer - March 10, 2011, 4:45 pm

(Mar 10, 2011 05:01 PM)achraf96 Wrote: [\[CITE\]](#) n900 i get it free on a nokia presetation.

I find that very hard to believe considering that they are expensive.

dennnyss - March 10, 2011, 4:56 pm

Hello TheUnknow,

first of all, i appreciate your big tut And big explanation on "how to hack with a cellphone" is very interesting.

And, at the end, you finish and say us that Nokia N900 is the best one for hacking: wirless systems & have a " pocket linux "

So, i ask myself:

1-to school i am learning linux, do you think with this phone i can use it like a real unix (debian) system?

2-i have already a nokia n95, this phone doesn't work like the N900? (or if i can install a unix system here like the n900 os)

3-what do you think about the SAMSUNG PLAYER ADDICT, who is running a WindowsMobile os, you don't think that he can do all that hacks like web hack, fake sms/call... someone told me it's one of the better phones (because you have the liberty, like the n900, to execute binary or windows files, navigation...)

Thanks for response, and congrats for this very interesting tutorial, i hope you will continue like this.

ps: i am french, sorry for the errors x)

Developer - March 10, 2011, 5:13 pm

1) Yes, the OS on the phone is just like a OS on a computer.

2) It doesn't.

3) I have no idea about this phone, but if it's Windows based OS, I doubt that it's as good as the N900.

Thanks for posting.

Korrupt - March 10, 2011, 6:42 pm

This is great stuff, i have been interested in the mobile device for awhile. Keep it up.

No problem. ? Glad to have helped you.

bugzymalone - April 19, 2011, 3:32 pm

Hey man..

Nice TuT, just read both parts..

One question.. The Nokia n900.. When you are hacking wifi using the phone, or spoofing phone calls etc.. I'm assuming its best to do it with a pay as you talk sim and not a contract sim?

Or can you still hide your identity even though the network have all your details (if your on a contract tariff)??

I know this is probably a STUPID f'ing question, but hey.. I am humble guy :)

Cheers

BM

Personally, I use Google voice to get a quick legit number to spoof if it's only a 1 time deal simply because there is a built in program in the Nokia N900 to allow you to have 2 phone numbers, plus make outgoing and receive incoming calls, as well as SMS for in/out.

The sim card does not records if you use the website to spoof, however depending in which g your phone is, either 2g, 3g, 4g, your phone connects to the networks of the phone company regardless or the information is stored on the ISP's history.

Hacking wireless internet requires you to use your ISP bandwidth or any sorrounding bandwidth to make the attempt. This has nothing to do with the phone networks, unless if you are using their internet provided services.

If you're going to attempt, get your Nokia N900 a VPS downloaded and installed on the system to cover your IP to start out, get your self a SSL tunneling system to spoof your real ISP info, and get yourself online through the bandwidth of someone else's ISP, not yours.

I don't think anyone has written a program to surf on the Nokia N900 through encrypted security using https:// but that's also another option.

Keredlee - April 29, 2011, 11:04 am

hi, I'm a new member.

really amazing TuT. I've read both parts.

Might be a stupid question, but all I want to ask is, isn't a jailbroken iphone 4 the best phone? Android OS phone such as galaxy s2 seems good too.

I never use nokia before but I've heard that it's lack of apps or something like that? Not a lot of people uses nokia phone nowadays...

Sorry that I'm a completely noob.

Developer - April 29, 2011, 1:27 pm

(Apr 29, 2011 11:04 AM)Keredlee Wrote: [\[CITE\]](#) hi, I'm a new member.

Sorry that I'm a completely noob.

I know that I might get flamed for saying this from other members, but iPhones are a piece of shit.

I've done lots and lots of research on cellphones regarding hardware, software, and durability.

Nokia N900 always come on the top.

Nokia N900 is a Linux based cellphone, rather than Android or iPhone OS.

There are literally hundreds of thousands of apps for Linux based OS, Debian to be exact.

Other cellphones are a toy compared to the N900.

Nokia is originally from Finland, so if you don't live in Europe it is very unlikely that you have heard of it or know much about it.

I don't live in Finland, but I have knowledge when it comes to technology.

Lack of knowledge is the problem for many. Over hyping a particular brand is another.

Cyber-Security - April 29, 2011, 3:01 pm

Thanks for the comment man. I never used the N800, but I have seen great things about it. However, it's a pocket computer.

devi01 - May 22, 2011, 5:46 pm

Very Very Great Tutorials and Info for all.

Yes N900 is nr.1 for hacking

I have installed a lot of tools for hacking on my N900 and working cool.

Great work TheUnknown1 keep going...

Modded_Mike - May 22, 2011, 6:15 pm

Love number 7, gonna give it a try tomorrow!

Piff - May 22, 2011, 7:32 pm

Very detailed thanks for the share.

Prince of Persia - June 5, 2011, 3:01 am

Hey I saw your thread and you can get free calling and sms? How does that work? Also can you get internet with it?

Developer - June 5, 2011, 3:34 am

(Jun 5, 2011 03:01 AM)Prince Of Persia Wrote: [\[CITE\]](#) Hey I saw your thread and you can get free calling and sms? How does that work? Also can you get internet with it?

Hey, I see you finally got the right thread correct.

And to answer your question.

I am using my cellphone, the Nokia N900 which has an app that allows me to login using Google Voice. Using Google voice I can make phone calls and SMS for free.

To get internet the cellphone, you can use Wifi, 2G, 3G, or 4G internet. OR you can hack anyone's wireless internet using tools that come along for hacking.

The Nokia N900 is a cellphone for hacking.

Prince of Persia - June 5, 2011, 3:39 am

How fast does it hack a wifi connection that is password protected? (Average rate)

Developer - June 5, 2011, 3:49 am

(Jun 5, 2011 03:39 AM)Prince Of Persia Wrote: [\[CITE\]](#) How fast does it hack a wifi connection that is password protected? (Average rate)

WEP - Around 5 minutes.

WPA - Varies from 5 minutes - 1 hour or more since it has to be bruteforced.

And same for the rest for the other WPA.

chickaid - June 5, 2011, 4:35 am

nice share bro, *respect to you

Voldemort - June 5, 2011, 5:02 am

Hey man, great thread! You have any idea if it is possible to hack into a WEP with a Symbian Smartphone?

SLNTBOB - June 6, 2011, 6:20 pm

Would you recommend any new phones that have surpassed the n900 since you posted this?

Developer - June 8, 2011, 1:55 am

(Jun 6, 2011 06:20 PM)SLNTBOB Wrote: [\[CITE\]](#) Would you recommend any new phones that have surpassed the n900 since you posted this?

There aren't any better.

(Jun 5, 2011 05:02 AM)Voldemort Wrote: [\[CITE\]](#) Hey man, great thread! You have any idea if it is possible to hack into a WEP with a Symbian Smartphone?

It should be considering that Symbian is a Linux distro.

NaT3z - June 8, 2011, 3:45 am

Awesome haha N900 looks like a good buy ;) I'm looking for a new phone atm.

shadowmon - June 23, 2011, 2:50 am

bookmarked it. i'll read it later. :)

Huknuup23 - August 4, 2011, 7:01 pm

Another great bit of info ... I am armed and almost ready. lol

sRi - September 4, 2011, 10:07 pm

Great information, awesome tut. I've read the whole thing to make sure I didn't miss any details.

wrongspeed - September 30, 2011, 8:24 am

Which dictionary would you recommend putting on one of these phones for bruteforcing WPA?

Interesting tut. Made me consider getting an n900 as a second phone.

Developer - September 30, 2011, 11:20 am

(Sep 30, 2011 08:24 AM)wrongspeed Wrote: [\[CITE\]](#) Which dictionary would you recommend putting on one of these phones for bruteforcing WPA?

Interesting tut. Made me consider getting an n900 as a second phone.

Honestly you're going have to collect your own list for a dictionary.

Start out by downloading the million of lists available here in HF.

wrongspeed - September 30, 2011, 4:03 pm

I know I was just thinking for the size of the memory for that phone you might have some pointers. I'll go digging. I just don't want to double up on dictionaries that have some of the same in both and use up memory, but I don't mind as I usually find something else that interests me along the way :) and I suppose I learn from refining my dictionary again.

Cheers

Hey Look Behind You - October 26, 2011, 8:41 am

Sorry for ing but yea, i have read all the comments from page 1 to 8 and all i can say is n900 is the best but nokia have a new developers device which is Nokia N950

Not yet release but it sounds like cool like N900

FlipIt - October 26, 2011, 9:35 am

very nice written tut man. this is so helpful and pretty understandable

Developer - October 26, 2011, 1:55 pm

(Oct 26, 2011 08:41 AM)Hey Look Behind You Wrote: [\[CITE\]](#) Sorry for ing but yea, i have read all the comments from page 1 to 8 and all i can say is n900 is the best but nokia have a new developers device which is Nokia N950

Yeah, I was checking out the Nokia N950 2 days ago and it seems as they will not be available to consumers, instead only to the Nokia Developers.

Awesome123 - January 30, 2012, 2:27 am

Via your recommendation, I finally decided to buy a Nokia N900. Thanks!

felini1 - February 18, 2012, 11:15 pm

This is fantastic great post very easy to do

davie890 - April 3, 2012, 6:54 pm

have have verizon so what phone on that network is good for hacking

daaceman - June 16, 2012, 11:04 pm

Is the Nokia n9 better for hacking than the n900? It's suppose to be the successor but idk

iconic091 - June 17, 2012, 2:41 am

From now there so many phone that sold out in the market and i dont know what is the better one and different operating system on every phone..what is the best one to buy and more affordable..N900 phone are not familliar to me..LOL but i want to try there performance soon..

The Nokia N900 IS still the BEST phone out there.

My first N900 broke because I dropped it literally 100's of times, but then I bought another N900. ?

SimpleHiTz - June 17, 2012, 9:00 pm

Great TUT man keep up the good work, this is really awesome for people just starting in stuff like this for sure, good job

Hacker 4949 - June 23, 2012, 1:43 am

clearly explained thank you for sharing and working a lot on this thread.

beastmode16 - June 24, 2012, 9:50 pm

great share man! You really always share very informative tuts and ebooks.. thanks a lot man!

foon - September 18, 2012, 10:12 am

i'll take your advice on this, thanks mate.

kaimate - November 21, 2012, 2:06 am

HONESTLY BRO IVE BEEN READING YOUR TUTTS OVER AND OVER FOR THE LAST HOUR OR SO

IT BLEW MY MIND

THANKS ALOT

Zenety - November 21, 2012, 2:27 am

N900 boss phone ever. Own 3 actually.

Adrian - November 21, 2012, 3:47 am

I will try this out :) thank you for tut :)

XRahat2013 - May 5, 2013, 8:16 am

I have a Samsung Galaxy SIII i9300.

Can I still crack WEP, WPA, WPA2, WPA-PSK, WPA2-PSK Networks?

If yes then please tell how?

Thanks in advance.

amar9888 - May 5, 2013, 9:02 am

awesome one ..i read starting to end :) very usefull

Developer - January 20, 2014, 12:23 pm

Not that I know of. Stick to what I suggested.

CrypticTheKing - January 20, 2014, 12:28 pm

Wow really helpful def going to try ASAP

Mr.Motivation - January 20, 2014, 12:58 pm

very detailed im going to try atleast those spoofing methods :)

Boxici - January 20, 2014, 1:37 pm

This is a great tutorial, not all the methods are useful to me but at least they are fun to try. Thanks for sharing

Piratehax - January 20, 2014, 1:46 pm

The Nokia n900 is really good phone for hacking but its also out of date but there is the neo900 now www.neo900.org check it out.

trojan. - January 20, 2014, 1:48 pm

Very detailed and precise. For the record, I'm doing a double major which includes Telecommunications lol.

Developer - January 20, 2014, 2:40 pm

I appreciate your contribution. Thanks for the info. ?

mony123 - August 7, 2014, 1:18 pm

Awesome tutorial there mate and wait..

ALL HAIL !!! NOKIA N900 USERS !!!

DrPanda - August 8, 2014, 11:10 am

See Damint now I gota go out Ditch my Sony xperian Z1 and now get the The Nokia N900 :(.... i need it ...

Hidden™ - August 8, 2014, 11:11 am

Great tutorial, we need more like this on here.

hacipa - October 11, 2014, 8:01 pm

How interesting! :D Great to read. Thanks for the tutorial.
