Thread: Free Working Skype Resolver

SpyProof - *January 9, 2017, 3:14 am*
Hello HF, here is a free skype ip resolver i've made, the user does not need to be on your contact list. try it before you judge it

http://SkypeResolver.net/

Let me know how you like it as ill be making many improvements and bug fixes

(Disclosure: this is not another generic database resolver, this is a fully working resolver that will get your current ip)

site has been updated

Famous Grouse - *January 9, 2017, 3:44 am*
Looks good...

Improvements, when it obtains the ip maybe you could add a feature of a map or even the location.

I.e. 10.10.10.10 Location: USA, Michigan and the map showing it?

Other than this pretty nice.

Working really awesome man, sadly you need points there.

AeroBlue - *January 9, 2017, 6:01 am*
damn this actually works, none of the other resolvers can find my ip lol

This actually worked. Nice work on creating this OP!
Yet I will ask, is it possible to get a blacklist?

brandonelliot - *January 9, 2017, 6:08 am*
Website seems to be down and its a little glitchy.

Just use VPN or check the internet for tutorials about hiding your IP in skype (forwarding with tor and many more).

I'll get on it, too bad I use Skype on phone too. Can't always be connected to a VPN or TOR on phone :/

Just ignore it, I'm sure you're not getting flooded 1 hour total in a week.

Pretty sure of that too. Well thanks for the suggestion. Currently setting a Socks5 on Skype.

Works nicely. Found all of my VPN's IP's. Just use web.skype to bypass this, but this is pretty nice.

If i notice the web server has any issues ill allocate more resources, thanks for letting me know

Yea its the best way i could come up with to keep the usage of the site low but attract traffic since its costing me to invest time on maintaining the site

And thanks glad you like it

The site is growing a little faster now so ill need to throw up a few more resolving servers which is probably why it didnt get the ip at first, ill take care of it now
