Try the search button before making a new post please. It starts to clog the thread if everyone does this.

\$ is an S

upload a file,

When someone downloads that file and goes through a survey you get 40-80 cents

What are we getting out of this? What are you going to give us?

You're asking to be spoonfed for free, and you didn't even say please. Just because you're new to this doesn't excuse you from being a complete retard. Use your fucking brain and search.

Also, you posted this in the wrong section. It's called HACKING TUTORIALS. Read the description:

Why should anyone help someone so careless and lazy?

You are being a bit harsh on him. My first few posts were also under the assumption that hackforums members live to serve, and yours were probably quite similar. I am slightly worried however that no one has told him by his 30th post that this is not the case. There is no reason to be overly rude about it though. (No disrespect meant to either of you)
