Thread: eBook creators' methods

flooners - *February 16, 2017, 11:10 am*
Why don't eBook creators just use their method and keep it private instead of releasing eBooks explaining the method?

After seeing plenty of leaked eBooks, I've come to think of all of them as trash; do you guys trust in eBook methods enough to buy them? Are their things to look out for when buying an eBook so I don't get trash?

Fantod - *February 16, 2017, 11:11 am*
Because the only way ebook sellers make money is selling the ebook, the methods are shit.

So I'm pretty much right? Never buy eBook trash?

You're correct.

The only way to make money through an ebook is selling an ebook.

James Burnham - *February 16, 2017, 11:27 am*
Most of the ebook sellers here are just copy pasting tutorials. In rare occasions people move on to a different method and they pass the knowledge they got through an ebook.

I considered the whole idea of someone using their own method while selling an ebook for extra money. Do you guys have any experience with an eBook that wasn't garbage?

James Burnham - *February 16, 2017, 11:30 am*
I had bought an ebook that wasn't garbage, but was really hard to implement. It needed you to create a site and put content in it. And unless you had prior experience with such things, it seemed very hard to do it.

No such thing as a method to making money, otherwise everyone would be rich. Stay in school

Pretty much this. Overall I wouldn't recommend any paid ones.

Not all E-books are garbage, most people have just bought a shitty one and are too lazy to implement the methods.

Yes, but sometimes sellers advertise their methods as suitable for lazy people.

What was the ebook you bought for that you had this experience with?

True, which in that case, I agree, is fucked up.

ALL money making ebooks on HF are garbage, even if you make $1k off it. It is not worth your time when you think about longevity. Better to not earn any money, get a IRL job and then research and learn about different strategies that will help you in the long run.

I'm wondering how many of those eBooks are made for lazy teens with no jobs.

Like strategies on getting a promotion your offline job?

If you can not get a job IRL for whatever reason, then making ebooks on HF is probably a very nice income. Money is money at the end of the day. But I am glad I spent my youth working towards something, and not wasted my time with "money making methods" Knowledge is worth a lot more than $1k or whatever these people are actually making from "methods"

I'm pretty sure he means developing skills that would be useful in a job. I have no doubt that some people learned their coding skills here and went on to have real jobs without formal experience or a

degree.

Educate yourself in Marketing, Managing, Legal Business, Stocks, Investments, EV (Expected value)

This will all help you in the future even if you dont go into business.

I'd say that it's worth it to buy one single eBook just so you get a good first hand understanding of how bad they really are. I can't tell the difference between most free eBooks and the paid ones that I've seen.

Physics - *February 16, 2017, 2:32 pm*
As someone who sold an ebook, the honest reason is you make money faster selling the method, rather than doing it. My method worked, and probably still works, but selling the ebook was quicker.

Top Potato - *February 16, 2017, 2:56 pm*
Well, there are really two types of ebook sellers:

Type -A-: People who are dishonest and are trying to make a quick buck of a method that either doesn't work anymore or never even worked to begin with.

And

Type -B-: People who are trying to make some money from their method as opposed to the method itself because, depending on the situation ofcourse, it's more convenient to them or they actually want to help people out.

I agree. Although I have seen some pretty bad ones from people trying to make a quick buck.
