Hello HF.

Well, usually I don't deface websites, but I did this for the lulz. Was bored as fuck and decided to take my boredom out on someone. ?

site: <http://muluthange.lk/>

But it also appears that the user Ismokeweed has piggy backed on their hosting, thus making it show on his home page too. Lulz.

Oh, and I sent a newsletter out too: ?

Meh, just wanted to do a little something, not too extreme, for the lulz. They are 474 users, some of them should at-least go to the doctors. Lulz. Changed the admin password too, that makes sure that the admin can't say they were hacked. Unless members see the penis I put on the front page. Lulz.

Mag1c-Pot - February 26, 2011, 7:38 pm

LOOOL nice bro. The pic and the email made me laugh. Would pay to see the admin's face xD.
