What's the current wait time between searches? That's the one aspect that I dislike about leakbase.

10 Seconds to reduce botting and lighten the load on the server.
Suggestions for a better delay? Let us know and we'll take it into consideration.

Edit: It was just lowered to 7 seconds due to your post.

People with active subscriptions are put on 'pause' and will resume once the service becomes paid again. To ease the flow we'll add a bit extra time to them.
