Thread: [Get to Unblocked Websites Using Google! - Google as proxy!](#)

AI-Bundy - March 1, 2011, 1:28 am

I have no idea if someone posted this before, but i though that as many are kids that go to school this will be helpful. I have seen tons of tutorials on using a cracker and using a proxy etc. But you need to realize that some schools block that too.

Ok, let's start from the beginning. We all know that Google is more than a search engine; we do use it as provider for email, mapping, news and many other services. Google is now also a free proxy service. Proxy is a device that stands between a PC and the internet, providing all the connections to the world wide web. What a proxy does is to receive all data from a requested site, so when you access web pages all data come from proxy.

The purpose of this is simple. To access blocked site.

Here is how to use it.

- 1) Open up your browser.
- 2) Go to - <http://www.google.com/translate?langpair=es|en&u=www.domainname.com> OR you can also go to <http://www.systranet.com/web>

In the domain name type the site you are trying to access and press enter. Thats it!

Its that simple. That will translate the page from ES = Spanish to EN = English. It will act as a proxy and you can surf without any hesitation!

buzasibg - March 1, 2011, 1:31 am

Omg, this is awesome :), thanks

AI-Bundy - March 1, 2011, 1:32 am

Enjoy happy surfing in school :D

paulos - March 1, 2011, 2:02 am

Thank you dude.

It was just that I was missing:)

Now the school will be a lot more fun.

actor - March 1, 2011, 2:04 am

Thanks :) it's easy and useful for me.

HackRain - March 1, 2011, 3:05 am

well, that was actually quite interesting. thank you for that!

=] i dont know how i havent thought of that XD

rep+

Volim te - March 1, 2011, 3:08 am

Lol thanks bro I use google translate for translating pages but I did not think to use it as a proxy thanks ,again mate!

Shannon R. - March 1, 2011, 3:10 am

I'm trying that at school tomorrow.

Basics. - March 1, 2011, 3:13 am

Thanks for the tut! Will be very helpful for others who have blocked websites in their school!

Good job

pepon - March 1, 2011, 3:27 am

Thanks for this knowledge is increased

Al-Bundy - March 1, 2011, 7:35 am

Your welcome everyone. Didnt know about it either till i tried it yesterday and it worked like a proxy.

YehiaPC - March 1, 2011, 7:42 am

Lmao very nice indeed (Y)..

im abcd - March 1, 2011, 7:46 am

lol .. thats really innovative ...awesome one

Al-Bundy - March 1, 2011, 1:53 pm

I tried using google in my school and they blocked it. I even tried using yahoo's and they blocked it as well. But they didnt block <http://www.systranet.com/web>

You can use that and get online. It is also added to the OP

explodemailbox - January 5, 2013, 5:37 pm

Keep sharing this is helpfull to me

skphero970 - January 5, 2013, 7:17 pm

opTimistic tool dude appreciatinG you for this great achievement an work with true Heart :

trin - January 5, 2013, 7:29 pm

i will try this today thank nice tutorial

lupekid - January 5, 2013, 9:46 pm

Facebook does not work says

The page you requested (<http://www.facebook.com/>) attempted to redirect to a page (<https://www.facebook.com/>) that could not be translated.

Al-Bundy - January 5, 2013, 9:59 pm

(Jan 5, 2013 10:46 PM)lupekid Wrote: [\[CITE\]](#) Facebook does not work says

This is more than a year old. Now HTTPS does not work with it. Only sites with HTTP can be accessed.

arun9020 - January 5, 2013, 11:50 pm

i made a tool for this.how dis?

Verilog - January 5, 2013, 11:51 pm

I already knew this mate, good help the community :)

Al-Bundy - January 5, 2013, 11:52 pm

Someone dug this up. This thread is more than 1 1/2 year old or so.

SHADOW REALM - January 5, 2013, 11:56 pm

All Queensland schools have google translate blocked, but there are heaps that use their API, just do a google search of free online web page translators

Origin™ - January 5, 2013, 11:58 pm

Wow thanks for this, after always searching for proxies with each of them full of pop ups this seems so much easier.
Vouch.

aneeshkollam5 - January 6, 2013, 12:00 am

thread is old but still useful,for those who dont know to use proxy or chage settings

FR33DOM - January 6, 2013, 7:36 am

Well all I can say is AMAZING ! gonaa try that for sure ^^

BiHGamer - January 6, 2013, 10:24 am

thank you man, helps out a lot :D :D

alexmkd1 - January 6, 2013, 10:27 am

Yes, but you can't open any website though, and the view is pathetic.
Anyway, thank you for you idea.

c0d3dh4ckl0rd - January 10, 2013, 3:56 am

====}> LOVE THIS! Really Great Tut....Thanks...

Luke - January 10, 2013, 6:34 am

FUCK I had no idea you could do this! Thanks so much OP! :)

Just Nobody - January 10, 2013, 7:14 am

This method is too much old... but always usefull! :)

hackexplorer - January 10, 2013, 11:03 am

I really got to try this the next day. Thanks in advance dude. ?

turbo manual - January 10, 2013, 6:07 pm

thanks, nice information there sir!!!

davyjones - September 3, 2013, 4:24 pm

Thanks alot, man.. its really helpfull...

shop10me - May 2, 2014, 4:40 pm

what an awesome tutorials for students in the school

Shiiza - May 3, 2014, 6:03 am

Awesome Method dude....

Keep the good work up..

Vantar - May 3, 2014, 6:07 am

This thread is 3 years old guys. So many gravediggers on this thread though :L

replaced - May 3, 2014, 12:06 pm

I'm pretty sure using google cache works aswell

???? - May 3, 2014, 6:25 pm

Haha, decided to mess with this at saturday school today and it worked perfectly. Thanks bud

SIM-1993099 - May 4, 2014, 12:50 pm

Thanks for posting. Will defiantly start using this.

NoPingBack - May 4, 2014, 5:47 pm

That is pretty cool I didnt know that was possible.

Going to try it right now on some websites.

Thanks for the tutorial!

ChuckTestaLolz - May 5, 2014, 2:24 am

This works too: <http://www.gmodules.com/ig/proxy?url=http://domain.com>

Pe?cil - May 5, 2014, 2:27 am

Thanks for that tutorial. I didn't know. I used TOR, but maybe I can change now :D.

assassassassassassassassass - May 5, 2014, 2:32 am

That is pretty cool I didnt know that was possible.

Sepia - May 6, 2014, 11:55 am

sorry mate but this doesnt work at my school, damn catholics!

x34c - May 6, 2014, 3:54 pm

Put a portable firefox onto a USB, use a proxy inside firefox from any free proxy sites.. spys.ru for example, then run firefox from your usb and there is no way school is blocking you anymore.

Romeoshine - July 22, 2014, 1:21 pm

wow what a good trick you've just given to me my bro' now i'm going to watch netflix in senegal great

jameshouse - July 22, 2014, 10:17 pm

haha this is great. never tried or knew about it...thanks much
