Thread: [\[REQ\] Good Crypter? WHATS A GOOD CRYPTER \[Questions\]](#)

CaLL Me MaZ - March 2, 2011, 6:42 pm

Sup guys. I am just wondering what would be a good crypter to buy. My bot is a DDoSeR 4.2 bot. So what would a good crypter be that isnt coded in .net with no dependencies. I have a good ammount of money so I heard travelerz crypter is good?
WHAT DO YOU GUYS THINK!?!?!?!?

HakkuR - March 2, 2011, 6:50 pm

Msg DaL33T and use Cobra Crypter I have it its good and only 20 dollars updates and all.

It has a built in USG (Unique stub generator) and 'c6p0 updates it very frequently.

I would not go with cobra, I don't like to diss people's work but I heard cobra isn't the best with compatibility/stability and I don't think he updates it all that much. But that is just my oppinion. I like own'z, it is \$30 and has the butt sex features too. I highly recommend own'z crypter.

Ownz is not all that 6 months updates fuck go with cobra and have it till u die, cobra has great comparability too.

YOU GUYS ARE CONFUZZLING ME!!! I AM WONDERING WHICH ONE ISNT CODED IN .NET I DONT WANT .NET and I ALSO WANT ONE CODED IN C++

HakkuR - March 2, 2011, 8:04 pm

C++ ones cost more but .net tho it has framework issues most frameworks are 2.0 and up.

so cobra crypter is coded in .net framework?

HakkuR - March 3, 2011, 4:01 am

Yes but i assure you it works perfect I use it.

Cheapest: 40\$ (Witthout Updates)

Expensivest: 60\$ (With updates)"

Whos right you or him? and whats C#? Does he mean C++?

.Astro - March 3, 2011, 7:49 am

Ownz Crypter. His free crypter that's dead now was a hit in the free section, so I definitely recommend checking that out.

You can also try esProtector, I don't think I spelled that right e.o; But yeah, I use it and it's great. There's tons of crypters you can use, but those are the ones that I've had some experience with and encourage you to try them.

Cool story bro, but he said price isn't an issue. Also, if you look at the life time of most crypters, they don't even last 6 months. Plus own'z is 6 months with at least 2-3 updates a week. Some times double that. Own'z is compatible with almost anything you could imagine, and has great support. On the other hand, I never get a reply from Dal33t :p

Thanks both of you!!! Thanks for the help. Still dont know which to buy. Hey guys should I maybe get travelerz crypter?

HakkuR - March 3, 2011, 12:54 pm

Dude go with cobra you have a member that recommended it and i have worked with all rats and used; botnet cobras is the way to go.

Hazurd - March 3, 2011, 1:27 pm

I haven't heard much about travlerz, so I honestly couldn't tell you.

<https://hackforums.net/showthread.php?tid=840988&highlight=best+crypter>

Here is the link to the best crypters. Sikander's is very nice (he helped 'c6p0 with own'z)

Sikander's is \$60.00 and seems pretty good.

Own'z is \$30.00 and I absolutely love it.

Stealth I also hear is good.

If you have a lot of money to spend I would suggest you look for a C#, C++ or Vb6 crypter. Cobra, ownz, stealth and sikanders are coded in vb.net so that means if your victim doesn't have .net framework, your server won't run on them.

DDOSER 4.1 is tricky to crypt, I doubt that cobra will work with it because I remember getting

complaints on blackshades that cobra corrupts blackshades. So if cobra can't crypt blackshades, I doubt it can crypt ddoser.

The thread link I provided has some with no dependencies.

You should try DooomsCrypt if the money are not a problem:)

theunknown18 - March 29, 2011, 11:08 am

i will crypt your server for you for £1 for every server. i know im new but i will

C??????? - March 29, 2011, 11:14 am

m doing server crypting for 2\$'s only

CaLL Me MaZ - March 29, 2011, 2:36 pm

Guys i said i wanted to buy a crypter not crypts... seriously?

You should try Shadow Crypter!

100% FUD and last longer than any Crypter!

Enjoy

rainer9 - November 13, 2014, 5:57 pm

You should get absolute crypytor its really cheap honestly and great and easy to use its fud and has heaps of feature and works well and with most rats

albabalogs - January 25, 2015, 7:46 am

You can try sending PMs to crypter coders and have them respond to u
