If you get caught with the skinchanger in the config, you don't get banned right? they just tell you to fix it?

and could anyone recommend a nice skin changer?

I'm just curious if being caught with a skin changer, has the same bannable offensive of vac bans for cheating?

Lol you can get banned if you edit configs in general.

Vac might get ur ass

Yes.

They aren't less detectable. Both skin changers and chests are prone to detection
