Thread: Searching for the most secure linux distribution!

BadBoy88 - *September 9, 2017, 4:35 pm*

Which one is the most secure and most unlikely to get hacked linux distribution exists today which i can easily install on my HP notebook laptop.(i5)
Please give the best answer you can!

TailsOS I think. Not too sure on that. It's also only for VM, but everything is routed through the TOR network, so it's pretty damn secure.

Everything is hackable. About the tailsos, if you wanna buy weed online its good. Other features are shit. Anyway good luck finding what you need

Yes I am aware of the fact that nothing is 100% secure.
Actually I am looking for a fighter who's the best among all in town to resist before getting knocked out.
Hopefully you will get my point.

Probably Qubes OS however its not easy to setup, you need a lot of knowledge to install and maintain the system.

clrlslwi - *September 10, 2017, 12:28 am*

Probably some random hardened linux distro maintained by some neckbeard autist

Even Snowden has commented about its good security, because of this I think its a tough one.
Will download this.
Any more suggestions people?
