Thread: So, my girls gonna get trolled soo hard...

Sooo, long story short.
I got a new Fiber optic service in my home, including internet and TV, etc...

Inclusive in this is the ability, as I discovered last night to literally stream my live TV service on my devices through any internet connection.

Further to this the app provided allows me to pair my devices together and use my cell phone as a remote to my TV.

This being said. I see a LOT of fun trolling my girl by being able to covertly swap channel on her as she holds the remotes ?

lol
I did this to my sister quite a few times and she was getting super triggered

I have IR blasters in my phone and it can control almost any device (except cars). I've turned off televisions with it even the AC in atm centres.

Have fun man.

I got Redmi Note 4 which has Remote app.
I always troll my brother.
