Thread: [If you got a rat and Plenty of Vics Try this///](#)

Cav3maN - March 4, 2011, 12:21 pm

ok i dunno how to put this and it has not been confirmed yet waiting for adfly to update but i have a chain link for 10 adfly link looping at intervals of 10 seconds i have got pages on my webhost with redirects to the adfly linking to the next page. i have a stats counter on the last page and i just checked and after about 5 mins i have got over 400 hits. so thats like 10/400 that will be like \$5 in adfly so ill post the code i have in each page in my web host

PHP Code

```
<?php
<html>
<meta HTTP-EQUIV="REFRESH" content="10; url=http://adf.ly/yourlink">
```

then make make a link on adfly linking to page 2.html then replace that link in that code with the one fore you next page then save as 1.html and make a new link in adfly to page 3.html and make a new html page with that link in it and call it 3.html and make a chain of as many as you want then make the last page link to the first page and there you have it

p.s the 10 in the code is the amount of seconds that the page has to wait before redirecting
[/php]

pm me for more help on msn omgitzcav3man@hotmail.com

Doesnt work, they have to click "Skip Ad" button to get 0.001 Cent which is kinda... lame. Adf.ly is waste of time.
