Now that the last episode aired, what did you guys think? Personally I think the last episode was absolutely fantastic and am praying to the elder gods that we get a season two. Seeing the different environments of all the levels of the abyss was pretty breathtaking IMO and there still so much more to show us with the white whistles and Bondrewd's experiments.

Nanachi was absolutely adorable and I need to get a nendo or a plushie of her.

Great anime, one of the best of the season, also the last ep's lewd jokes were on point lmfao. Even though the MCs were young it had a lot of dark moments which I thought was pretty nice, but a genuinely good anime from this season.
