Brief Synopsis:

Wanko to Kurasou follows the life of Yuuichi, a college student, over several months. He teaches a cram school and lives alone. He was an orphan when young, and was adopted by an escort. He spent many years growing up in brothels, and eventually entered the industry himself. The experiences he had when maturing resulted in him becoming cold and cynical towards the themes of love and attachment.

Impressions

Story; Overall the game offers many routes you can take, meaning you can choose to position yourself for the character you would want to "get with". The story line is linear, meaning that even if you choose a route, it would not affect the main plot of the game alot. I dont like the main char because he seems to have NO emotions whatsoever. (E.g Her: I'm cumming! Char: Oh...okay.)

Art: At best I give it a 8/10. Why? Because the art was censored. Although it contains delicious loli CG with tons of H, it gets marked down 2 points for having that damned censor. Probably because Ivory couldnt sell it without a censor on it.

Theme: This game is based around a world where anthropoid pets exist. For you furies out there, this game is a must. Although for non fufags, like myself, I enjoyed the theme nonetheless. Undoubtedly this game was targeted towards an audience that likes lolis, but it also offers something for furies.

Rating: 3.5/5

Yeah, those are the two main Arcs.

Well if you have 100% CG, then do you mind packing that up in an archive for me? ;)

I love to keep a collection of CG. I've only managed 48% of it so far.
