Service I paid for:Shado Botnet Service ||Cheap | Gift Included| Private Tools|| || BTC & Paypal
User hackforums.net/member.php?action=profile&uid=3190789]"
Story: I paid ShadoBlH $40 BTC for him to setup a botnet for me. I sent him the money and told me it should take up to 24 hours to get it completed. I asked for bb botnet which he said he could setup. He setup the botnet for me and sent me the login information for it however he didn't give me the vps information. So, of course at that time I'm angry because I paid $40 for a botnet which I thought would've included EVERYTHING and just "access" to the botnet I paid for. So fast forward a couple of days from that moment he messaged me on skype saying that he restricted my access to MY BOTNET which I PAID for. He told me to remove a post I made about what his service really had. So, he told me that I have to remove or edit my post because it breaks his T.O.S which it didn't at the time but he edited his thread for it can be included. I told him I wouldn't remove it but I'll edit my post with more information and that information being what we talk about in skype. I did not leak ANY information regarding him nor myself all I did was inform future customers about what his service really about. Fast forward to yesterday the botnet I paid for was shit down and I asked him why it was shut down and he told me he has to contact their support. I contacted him today regarding a refund since I don't want to deal with me gaining a lot of bots then having my botnet shut down. So, I thought I'd post in his thread with my current situation and he messaged me on skype saying I am now banned from his services and will not get a refund. Also, I know I was being a dick but I was mad at that time and expected more for $40. Guess you can't trust HF to buy any good quality product.

this is methode to scammed but multi user is in the same proble
