If you know of a search engine you would like to see featured on Searcher543 please post it in this format-

Quote:Name:

Link:

Category:[Informational, Social networking, Search, Other]

Why should it be on Searcher543:

Additional Information:[This is optional]

VA Tragedy - March 5, 2011, 5:13 pm

Glad too see there is some variety of engines. Not a bad tool, thanks for the contribution.

Cody8295 - March 5, 2011, 5:14 pm

Nice little release, keep up the good work.

Raf Simons - March 5, 2011, 5:17 pm

(Mar 5, 2011 06:13 PM)VA Tragedy Wrote: [\[CITE\]](#) Glad too see there is some variety of engines. Not a bad tool, thanks for the contribution.

Yeah its got 20 engines and counting! I will be adding more as I come across them.

(Mar 5, 2011 06:14 PM)Cody8295 Wrote: [\[CITE\]](#) Nice little release, keep up the good work. I will do my best to keep on contributing to HackForums! It give's me the endurance and willpower to keep learning when I see post like your's and VA Tragedy's.

Brettly - March 5, 2011, 5:43 pm

Ahh i remember i made one of these with like google bing yahoo and wiki.
Fun stuff.

Keep up the good work hope to see more stuff later on.

Raf Simons - March 5, 2011, 5:53 pm

If i get any better you will most likely be seeing my stuff more often.

Brettly - March 5, 2011, 6:00 pm

I hope so. Good luck on advancing your line of code.

Raf Simons - March 5, 2011, 6:11 pm

(Mar 5, 2011 07:00 PM)Bb1707 Wrote: [\[CITE\]](#) I hope so. Good luck on advancing your line of code. Thanks for the encouragement.

Coleak - March 5, 2011, 11:26 pm

```
If radiobutton1.checked = true then
Process.start("http://www.google.com/search?q=" + Textbox1.text)
Else
If radiobutton2.checked = true then
Process.start("www,yahoo.com/search?q=" + Textbox1.text)
else
```

and so on...

.Astro - March 5, 2011, 11:29 pm

Nice work. It's not another CrackMe, Keylogger, Crypter, and such thread. Good to know someone's looking at Vb.NET in the general view.
You should do Checkboxes instead so more results show up.

Raf Simons - March 8, 2011, 10:12 am

```
(Mar 6, 2011 12:26 AM)Coleak Wrote: \[CITE\] If radiobutton1.checked = true then

Else
If radiobutton2.checked = true then
Process.start("www,yahoo.com/search?q=" + Textbox1.text)
else
```

and so on...

Obviously. It is simple but useful.

(Mar 6, 2011 12:29 AM)Crex Wrote: [\[CITE\]](#) Nice work. It's not another CrackMe, Keylogger, Crypter, and such thread. Good to know someone's looking at Vb.NET in the general view.

You should do Checkboxes instead so more results show up.

Thanks. I want to appeal to the general computer user, not just hackers.

A B c - March 8, 2011, 10:34 am

Yes this is a neat tool and good luck with any further progress.

Doctor07 - March 8, 2011, 11:05 am

this is a nice little release dude, and something different! :D

RiperFish - March 8, 2011, 11:41 am

Nice release man, 5stars :).

Ingenuity - March 8, 2011, 1:44 pm

You should make it so that the user can customize search engines...

Raf Simons - March 8, 2011, 3:16 pm

(Mar 8, 2011 11:34 AM)A B c Wrote: [\[CITE\]](#) Yes this is a neat tool and good luck with any further progress.

Thanks for the support. I will keep on trying to make progress and make better programs.

(Mar 8, 2011 12:05 PM)Exploit™ Wrote: [\[CITE\]](#) this is a nice little release dude, and something different! :D

I'm trying to individualize myself by making different programs. It helps me get better know faster.

(Mar 8, 2011 12:41 PM)ThePrince Wrote: [\[CITE\]](#) Nice release man, 5stars :).

Thanks. I will be updating this and releasing more programs.

(Mar 8, 2011 02:44 PM)Jack Eagles1 Wrote: [\[CITE\]](#) You should make it so that the user can customize search engines...

What exactly do you mean? Allow them to choose if they want images, videos, news etc?

Ingenuity - March 8, 2011, 4:38 pm

I mean like the one I wrote: <https://hackforums.net/showthread.php?tid=1114328>

Raf Simons - March 8, 2011, 5:33 pm

Wow! It looks really nice. Hopefully I can learn something from checking it out.

DaRkReD - March 8, 2011, 6:24 pm

Make it be able to check all and output the results in a custom window. Also add wolfram alpha

Raf Simons - March 9, 2011, 3:05 pm

New Update-

ident - March 9, 2011, 3:09 pm

1) I would suggest losing the eye so green.

- 2) You are assuming the user has the dev DLL (wont open)
- 3) Way to many un needed controls taking up memory.

Raf Simons - March 9, 2011, 3:17 pm

(Mar 9, 2011 04:09 PM)iDent Wrote: [\[CITE\]](#) 1) I would suggest loosong the eye soar green.

- 3) Way to many un needed controls taking up memory.

1) No thanks.

2) I thought most people using visual basic would have DotNetBar or atleast should have it.

3) The memory is nothing. Unless your computer is overflowed with trash the extra bit of memory should not effect you.

4) All you do is criticize. I have no problem with that. I just want to know why you never have a good word about anything.

TheDubWubCub - March 9, 2011, 4:09 pm

i really like the idea :D

Raf Simons - March 9, 2011, 5:39 pm

(Mar 9, 2011 05:09 PM)21mods Wrote: [\[CITE\]](#) i really like the idea :D

Thanks. I'm glad people like it.

Achlys - March 9, 2011, 7:04 pm

Great program.

[Video: <http://www.youtube.com/watch?v=zT8SYu91Scs>]

edit ([Click to View](#))

Added Video link.

Raf Simons - March 9, 2011, 7:09 pm

(Mar 9, 2011 08:04 PM)Achlys Wrote: [\[CITE\]](#) Great program. I'm going to add a video review soon.

Oh Cool! I would really like that! Sadly, I am not very good at Visual Basic so I probably wont be getting a very good review, But at least knowing that my program is review worthy makes me extremely happy!

Achlys - March 9, 2011, 7:18 pm

I'm good with Visual Basic. I can redo the GUI for you, if you want.

iDent Wrote:3) Way to many un needed controls taking up memory.It's only 37KB, a whole 2KB isn't going to make a huge impact.

Raf Simons - March 9, 2011, 7:54 pm

It's only 37KB, a whole 2KB isn't going to make a huge impact.

That would be awesome if you could make me a better GUI! I would definitely give credits to you and you can put a label in Searcher543 saying something like "Credits for the GUI got to Achlys".

ifconfig - March 9, 2011, 8:22 pm

neat little utility! nice work!

Akolt - March 10, 2011, 5:43 am

```
(Mar 6, 2011 12:26 AM)Coleak Wrote: \[CITE\] If radiobutton1.checked = true then

Else  
If radiobutton2.checked = true then  
Process.start("www.yahoo.com/search?q=" + Textbox1.text)  
else
```

and so on...

Why use process.start ? Why not

```
WeBbrowser1.navigate("http://www.google.com/search?q=" + Textbox1.text)
```

cause process start thingy will just probably launch IE which is completely shit It's better to just add a web browser Beside which will be good for those who don't have good computers and this IE will result of massive lag because it's shit and who got bad computer will never use again

4) All you do is criticize. I have no problem with that. I just want to know why you never have a good word about anything.

1) it was only a suggestion.

2) You should never assume your target audience has it. You are making an application for the public. Why would joe blogs have Visual studio?

3) Each control requires a window handle, GDI resources, and a message loop.

4) never have a good word? How about the the many times i have viewed a project, re coded it fully commented and messaged a user with the new project? Or the countless examples i post up? Why should i say what a wonderful piece of coding on some thing that is done badly? I'm here to try educate people if i can do so. This is nothing to do with you or any one else as a person.

Raf Simons - March 10, 2011, 1:30 pm

I appreciate your help but you could say it in a nicer tone.

(Mar 9, 2011 09:22 PM)LLOORREENNN Wrote: [\[CITE\]](#) neat little utility! nice work!

Thanks! Sadly, I accidentally deleted the project folder and have to re-do it all.
