Thread: [All Triton logger customers are scammed!](#)

morbotz - March 6, 2011, 1:13 am

Hello, staff. I and more other people just bought the Triton Logger and sellers told us it will be released in 2-3 days. Almost 1 month and no news and progress. Nobody inform us about what's going on with this fuckin' logger.

[As you can see - 50 pages with promissess and patiently.](#) We all were tolerant for long time, but I can't wait anymore.. I paid for logger, not for patiently!

KIngCobra and Mystic Guru are always offline and there is no way to contact with them. If I message Mystic Guru he always argues and he has bad behaviors.

I think there is no need of proofs, because a lots of people can approve they are scammers, and you also can see their thread is in Junk section. That means they put away the project and all buyers are fucked!

Contact them about it then. HF isn't the only thing in these people's lives.
