Thread: Niche Ranked on first page of Google

Okay so I started ranking this game hack niche and now its on page 1 of Google for all my targetted keywords

I am getting around 250 page views everyday on my landing page

But 50% of this traffic is South Korean and I have checked multiple CPA networks no one have SK offers

And 90% of this traffic is from desktop

I am making around a $1-$2 per day

So all I want to ask can anybody suggest a network with good South Korea offers

Just checked on all my networks that i'm in (in a lot) and none have KR offers there's only 1 (adcombo) but it's cash on delivery for some sort of gel product. might have to ask around on Blackhatworld and stuff see if anyone knows.

The problem with BHW is that most of the guys don't know shit and they claim to making 100's of dollars per day but actually they survive on their mothers credit card.....anyway I will still try there.....thanks for the time to check in your networks ?
