DeToX - March 6, 2011, 11:59 pm

To all D.NET customers please ignore Danf, he is simply trying to hurt my sales because he cannot make any of his own, also to all D.NET customers, please note that Danf claims d.net does not work because he does not understand the .NET requirement

FAQ:

Q: How Do i geta bot? D.NET DDoSeR Doesnt Have A Builder?

A: You have 2 options

You use the builder... DUH >.<

When you purchase, the download comes with 1 default bot, to connect to 127.0.0.1 on port 85,
you then have a custom you with your DNS

This is a method im using to stop leaking

Q: How do i choose what functions are in the bot i request?

A: You fill out the template i send you or that is located at the top of this post

Q: Does D.NET DDoSeR Haveany requirements?

A: yes you and your victimes must have .net Framework 2.0 or higher, luckily most people have .net Framework now cause Win7 comes with it preinstalls and etc also Vista And XP SP2

cant wait for 3.0 with built in crypter xD come on

DeToX - March 26, 2011, 8:45 pm

Sorry guys D.NET 3.0 is being delayed about a week, i have to rewrite the bot, and install cause it has stoped working...

so im restarting the whole bot....

sorry for the delay i promise ill make it up to you guys :) <3

haxor24 - March 27, 2011, 1:30 pm

DeToX - March 27, 2011, 10:27 pm

ok for 2.8 which ill release tommorow... i added:

For Bot:
RAR Spreader

For Server:
Suspicious File Scanner

ill be adding more security features to D.NET, to help keep you guys uninfected, this will also help me with the bot killer can i can kinda use the same code :)

MrHighRoll3r™ - March 29, 2011, 10:50 pm

Cool so how much for the premium ver. also whats the difference between premium and basic ver. I'm definitely interested!

DeToX - March 29, 2011, 10:55 pm

i thought i would pm you and reply...

The premium version gettings newer things first, and better things, like the new builder that is comming out, only premium users will have access... basic users will still have FUD servers but, wont have a advanced builder with options of stuff like icon, assembly info, startup name, mutex and more

also basic users will have to wait a extra week for the new flooder engines being implemented into D.NET

Banks? - March 30, 2011, 11:03 am

He's right. I would expect a D.NET Project HTTP bot to come out soon. If anyone remember my ramblings about my "Z3R0 Bot" from before I started the "Z3R0 Crypter" (originally intended to go with Z3R0 Bot), that's what we're building on. Z3R0 Bot is a fully functional HTTP Bot right now, but I'm working on adding in some advanced features such as advanced process persistence and a no-EOF builder.

Virus1x - April 3, 2011, 4:47 pm

Attention Buyers: Noticing these problems.

- #1. Current STUB makes 3.2 not 3.3 bot
- #2. when you CLOSE or DC and REOPEN or RC you lose 50% of your bots on view however they still connect to your PC (Comodo shows 151 individual ips shows 41)
- #3. after 10-30 minutes it shows communication DC or Connections ect ect..
- #4. Botkiller is Unfunctioning
- #5. My attempts to install thus far are fruitless

I attempted to speak with Jordan or DeToX about this on MSN

I offered to show on TV his responce, I'm too busy to deal with this..

Correction didnt block me lagged out however now he says im trashing his thread

Great Customer Service!

Great Customer Service!

1. Thats a simple error, i forgot to include new stub with update
2. Your the only one ive ever had with that problem so what ever
3. Again? no one else has ever had that issue
4. I told you botkiller is being added into the next release, i removed it for 3.3 as it was bugging
5. Again, no one else has that problem so....

A. i have a support team your can contact, i am very busy supporting others + coding the updates / fixing bugs

B. i didnt block you i lagged out, contact my support team located on main page...

C. thanks for support ;)

in conclusion does anyone ever read the OP for support? please do it has very important information

?D?vi??c?t?™ - April 4, 2011, 1:27 pm

Bumping this the OP is a nice guy.

marcbob - April 4, 2011, 1:32 pm

So the file it outputs is FUD? If so I'm 100% interested in buying

yeh each build is Crypted with our %100 runtime / scantime Crypter :)

haxor24 - April 4, 2011, 10:37 pm

The File Out Put is 100% Fud And So far D.net 3.3 is Working Good

Virus1x - April 4, 2011, 10:41 pm

Waiting on INFO on Premium Site & Update

DeToX - April 5, 2011, 6:31 pm

3.4 update :)

more stable... better refresh and epic bot killer <3

enjoy guys

@Virus1x, i told you the premium section is not done yet... so calm down ...

jgwentworth - April 9, 2011, 8:53 am

Very nice program, I'll be looking to upgrade shortly. ;)

iNviZ - April 9, 2011, 9:01 am

This program works really well.I love the botkiller

DeToX - April 9, 2011, 3:22 pm

Sorry for slower updates atm guys, ive had a lost in my family i was at a funeral yesterday and well just havent had the time or will to work on D.NET DDoSeR.... dont worry though ill be back in action soon

iNviZ - April 10, 2011, 8:37 pm

Fuck yeah update kicks ass bro.You always do the best.

DeToX - April 10, 2011, 9:25 pm

new hosting is being setup for the website... bare with us guys... its almost done :) just need 48 hours for the domain to update :)

Didn't get a LINK

Pm ME one please

DeToX - April 13, 2011, 3:25 pm

sent link...

sorry for delay... been busy with rugby last few days... i got lots of practices... and game next tuesday ...

Virus1x - April 14, 2011, 2:26 am

Alright DeTox I have been patient and I understand you have real life shit going but...

ENOUGH is ENOUGH

I can't leave this bot on for 5 minutes before it closes itself or gives that error where it says its been backdoored

I've infected over 5,000 things with my bot only 15 show.. so either persistance is broken or something is.. because I can't keep them for more then 2 minutes

You update system SUCKS... when you release an update if we dont have it running we don't get the prompt when we RE-RUN it we cant get the update until you come on, if you put it on the site a download for us PREMIUM it would be nice..

I know your PREMIUM isn't done but.. these things are constant bugs and unacceptable..

This bot is very VERY buggy and unreliable I can't use it half the time..

the other half I lose all my bots..

Now on the plus side..

The DDOS is STRONG AS FUCK!

SYN/HTTP/UDP

strongest I've ever SEEN.

However.. that doesn't make up for all the shit that it is going wrong with it..

Now i don't mean to pick on you or bash you I understand we all got problems

However..

Girlfriend Dumping you.. Family member loss (Which You have my deepest Condolences) and RUGBY aside..

These are the 3 excuses I've heard from you with absolutely no ground being made on resolving these issues I've told you about over 100 times..

Ontop of all of this... You've told me to watch the vids contact support yada yada I've done it all and it hasnt fixxed anything

I await your responce to this..

S M I T H Y - April 15, 2011, 3:46 pm

hey i agree with virus1x, although im not having as many problems as him but i am getting a very bad problem which is id say about 3 in 10 bots follow command

Virus1x - April 17, 2011, 1:11 am

I'm going to request.. a REFUND

NETio - April 17, 2011, 11:28 am

I apologize for the bugs, I would aid you if I could, but I only maintain the source code to the crypter, which is still FUD as long as you add any icon, and some fake version info (both are built into the Premium version). If you would like to contact me to discuss a mutual agreement to make both parties happy, I would gladly do so. PM me for my XMPP(Jabber), ICQ, MSN, AIM, or other form of contact. I'll be glad to discuss terms to bring about a mutual agreement and contentedness. Virus1x, I've already PMed you with my contact details.

Virus1x - April 17, 2011, 5:43 pm

I added you.. however what I really want back is my \$

S M I T H Y - April 18, 2011, 3:10 pm

hey i really need my premium set up. i brought premium when it was at like v2.7 still havnt got it

NETio - April 20, 2011, 2:45 pm

Guys, Jordan (i.e. DeToX) hasn't been online on MSN in a few days, but he has apparently logged in HF today... I'll do everything I can to provide support to customers, but I don't have the source to D.NET, so I can't maintain it (meaning I can't make updates, fix bugs, etc.). All I can do is provide support and wait for Jordan to come back and pay me and fix D.NET. I too await his return.
