Double agreed. Making your grade a little better is not worth the risks. Some kid at my school a few years ago did a similar thing and got expelled.

Depends. If you're being physically mo itored you are fucked. But if it's pure digital monitoring you can just keep your phone/PC/notes at hand to slay that exam

It's not worth cheating man, trust me if you cheat your way till Year 12(without getting caught that is), i guaranteed you're gonna get fucked over, don't risk your potential and future for a couple of tests/exams.

Wanna know a hack or cheat to succeed in school? Stop being a lazy fucking kid and start sitting down and taking the time to study and learn.

I do not think you will learn to hack good if you do not try hard in school

If it's an online exam then why would you need to hack? You could just find a friend and ask them for the answers.
