Thread: cache,cookie,passwords,history saved to firefox profile explicitly?

Account of the Gods - *March 7, 2018, 1:35 am*
So theres this function 'profiles' in firefox

but its shit*y. i can save passwords to profile, but when i disconnect, they are still on pc rotfl.

i wanted to create a shortcut that would login on profile, and then profile would contain all your history and shady stuff. but when you shut it, it should have none when you run firefox by default.

How to achieve this? lol

who the fuck are you sharing your computer with ? the fbi

Id start by reading this: https://www.microsoftpressstore.com/articles/article.aspx?p=2453566

You need to set proper permissions if you want security on your stuff. That or change your lifestyle and who you live with.
