Hey, guys! I got a review copy and this is my honest review. I never talked to ThomasGB before and this is a review as unbiased as possible.

Firstly, I got to say that I am impressed about how the procedure went. I was asked to sign up on digishops.xyz and once I did I noticed that there are a few interesting products/services there. Signing up is free so I suggest you sign up to take a look.

ThomasGB gave me a coupon code (yes, digishops.xyz has its own coupon codes system) and asked me to redeem it and place an order for the product I want. So I redeemed the coupon code and then placed an order by providing the link to the script that I wanted. The system automatically detected thumbnails and descriptions and I placed the order.

After 1-2 hours I checked my "orders" tab and the script I wanted, was there. It was uploaded on mega.nz which is very convenient to us and had a Purchase Code. I think Purchase Codes work as proof of purchase when you are requesting help from the authors.

After downloading, I unzipped the script and checked if everything was as it was supposed to be. It was good. All the files were there, documentation too. I have nothing bad to say about that service. Great site, great seller, great delivery speed. This is a service that I plan on using again in the future.

Thanks for the review copy, ThomasGB.

DoctorSheep Service Review for "DigiShops Envato Services" by "ThomasGB".

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your Service.

First of all, I want to talk about ThomasGB Envato Discount Market. (Digishops.XYZ) The service itself is fascinating and never before seen in the marketplace. Based on the information that I have gathered around about the seller providing this service on the sales thread, it shows that you're able to get the listed service at 50% off. Although the thread was able to provide standard information if you know the common knowledge of the majority of the sites, as a seller. You should want to offer more than enough information, to at least cover all thoughts of confusion the customer may have when it comes to wanting to purchase anything from you.

If you were able to get a better thread design made that talks about the detail of the service, the benefits of the service for the customer who may be interested or may find it useful for their gains and probably show a tutorial video on how to properly use the website would be a great site of improvement for the seller.

The site is supported by all standard models for fast internet support.

The concept of the service is my favorite. Being able to select anything you want and placing a random invoice for the customers to only have to pay $50 of the total price of the product. I love the Idea and I can already tell the service will be very beneficial to many members.

Final Thoughts

The service itself deserves very high credit. I can see the concept and how this will be very useful in the marketplace. Especially for designers looking for a quick mockup for cheap. The best advice I can give to the seller is to properly display your content on the sales thread. Create or purchase a real thread design that best fit to support the quality of your service. Add tutorial videos explaining or

demonstrating the process and how everything works overally.

Had a few questions about the Purchase & licence codes.

The script I'm after was recently updated to include a proper system for licensing & requires you sign up to their site with the purchase code for support, The ToS mention it has to be used in 48 Hours, If I install it with the script & sign up will that purchase code be unique to me or will there be a chance someone else has already used it to sign up & create an account with that code?

Same for updates, is that code just invalid or will I be able to use it after 48 hours for re-installs & updates?

I've been checking the files and they are 100% 'original'. I purchased an item that I already owned (real purchase from Themeforest) just to compare and see if there were any differences. But there are none.

Will probably use this site a lot in the future. Thanks.

Hi

My orders are still pending. Same user name

Castro - *August 4, 2018, 5:49 am*

Order has been pending over two days, no response from OP. Another day and I'll have to open a scam report.
