Thread: Prune and Recount

Omniscient - *March 27, 2018, 10:35 pm*
Just a quick heads up that 1000 threads in Junk were deleted and a member post recount was done. I noticed it wasn't accurate and wanted to run it again. So if you're off by a few posts you'll know why.

And there goes all my posts.... lol kidding I just lurk

Or maybe like me, you bookmark Hq threads lmao - will check later.

Off by 4 lol. I don't really post as much as I used to back then.

Thanks for the small update Omni.

Eh it seems I have a lot to say/contribute to the community so as long as they were already in junk :)

Wasn't one done before? I don't think I lost any posts.

I know fuck all about how the MyBB backend works, but is there any reason that it doesn't do a recount every time a thread is cleaned out of junk automatically?

I'd like to know this as well, also would it be possible to run a cron job for a re count everyday or would that use to much resources

I use a custom plugin for pruning. In order to expedite the prune and optimize the queries we don't alter the post count during the actual prune. When it's completed I run the AdminCP recount tool.

Yay, still above 5000 :-) That's my only goal in life. Maybe buying ub3r is also a goal, but I've postponed that for a long time now.

How often do you prune accounts with zero posts, and how long must they be inactive before being eligible for a prune?

Thanks

But MyBB would always run these as scheduled tasks. I think even the default MyBB pruning is also ran as a scheduled task?

My post weren't effected, guess none of my post are junk.

Any plans to bring the feature back to Ubers?

Edit:Junk.

Biggy - *March 28, 2018, 10:19 am*
I didn’t lose any posts. Woop woop.

Thanks for the update.

It didn't affect my post count at all.
But I don't think 1000 threads in junk would really have a big impact, since they're usually junked for a reason and maybe don't have a lot of replies I guess?

Saltpeter - *March 28, 2018, 10:24 am*
All the posts I had in junk were gone a long time ago. Sounds good boss man.

I do it whenever. Normally I do zero post accounts that are older than 60 days but sometimes I'll do it 30 days.

MyBB does have a 0 post prune but unfortunately it doesn't take into account a usergroup to exclude. So I use my own tools to prune them. Otherwise l33t upgraded members may also get pruned along with accounts like Sticky Bot.

Nope, the Ub3r junk feature is now gone. MyBB 1.8x offers options for soft-delete which may get incorporated but the mass editing and junking of HF content has to be restricted.

Most junked threads have 2 posts, the post split away from the original thread and the reply added by the moderator during the junk action. So it wasn't long threads generally and probably less than 5000 total posts.

I don't even remember what my post count was before lol

Meh. I'll hit 24k someday. Til then, remember, quality > quantity.
