because the author of the template is advertising his website xD

tlatmdeh0904 - July 3, 2011, 5:17 am

It says skin file not found wtf

stick397 - July 20, 2011, 12:50 pm

ok to solve the skins problems or If it says you don't have the correct license for the istealer builder
your gonna need VB or to those who dont know what I mean Visual Basic. For those who haven't
got it install the following software from this link

<http://www.microsoft.com/visualstudio/en-us/products/2010-editions/visual-basic-express> and will
work. Please give me some good rep please!
