Thread: [\[TUT\] Change SLIDE BAR TEXT \[TUT\]MyStrings\[TUT\]](#)

joshboii1992 - March 9, 2011, 9:56 am

Today im going to show you how to change the text of slide bar and many other things :)

Must be Jailbroken and have Winterboard this works on any device 3.1.x - 4.1

The Tweak is called MyStrings

What is MyString ?

MyStrings is a great tweak for iphone ipod and now ipad that allows anyone to easily change their systems default strings in a nice and clean interface.

Open Cydia go to Manage>Sources> Edit> Add. Then add <http://podulo.com/>

When that has finished installing search "MyStrings" all one word and install it.

Then respring your device. Go to Winterboard and check "Activate MyStrings" Then respring again.

Go to settings scroll down to MyStrings. Scroll Down to Sliders and costermize as you wish.

Ps there are many other strings you can customize with MyStrings. E.g. Slide to turn off text

Applications

Interesting tweak, but why do you say only 3.x to 4.1? 4.2.1 can be jailbroken too, either on Windows or Mac.

Mewtw? - March 10, 2011, 10:24 am

Thanks for your tut mate even if I already knew that but I have a question. I can't find Winterboard, where can I find it ?

Thanks.

i ment the tweak only works on 3.x to 4.1 well that what is says in cydia

`S [!] s K 4 _ ^
It should just be in cydia

War2runner - May 18, 2011, 10:31 am

it really works

(message too short)

Thanks.

Add these repos :

<http://sinfuliphonerepo.com>

<http://cydia.hackulo.us>

<http://repo.insanelyi.com>

<http://cydia.xsellize.com>

You can find almost anything including winterboard mate.
