First of all big vouch for this HQ user. I crypted my payload, scanned on Antiscan(dot)me the file was not completely scan time FUD the detection was about 3/25 (at the time of testing*).It is completely acceptable as the project is under BETA state and I hope the owner will fix this soon.

Now coming to runtime test , the payload on Win-Defender and Mcafee the file was runtime Fud however when tested on eset the file was detected on runtime.

Overall I will say its a nice crypter I may consider to buy it when it releases after BETA.
(Jun 10, 2018 09:45 AM)seler Wrote: [CITE] Nice job, I vouch this crypter so much.
I've tested with some rats like NetWire and it works pretty nice.
Also with miners its crypts very nice.
Just need to add assembly info but its propably will be soon in next update.
Thanks man!

Hey,

Sounds good. I will sent you details tomorrow. Not on pc right now.

Swoomie - *June 8, 2018, 3:35 pm*
You claim the stub is FUD runtime as well as scantime, can you provide proof of runtime in a Run4Me scan? Lack of proof here.

As well as can you provide runtime bypass proof?

int - *June 8, 2018, 3:37 pm*
same theme every time. english is very incorrect. I doubt its runtime fud

vaxton - *June 8, 2018, 3:37 pm*
vouch for IzzyMichiel!
user is really experienced, and he is working really hard on this project!

good luck with selling buddy :)

Hello,

You are correct! I just made this before went offline so it was a fast job! ;)
Will add a runtime scan tomorrow!

Thanks,

Well,

Theme is just a theme... and typos needs to be fixed ASAP! Thanks for reporting.

Swoomie - *June 8, 2018, 4:03 pm*
I don't see an "Anti-Memory Scanning" feature on your form, does your RunPE / LoadPE include this feature?

interesting. as the users above said, show some proof of scans

ashwathama - *June 9, 2018, 12:02 am*

Crypter seems nice , waiting for a runtime scan.

But why scan on Jotti , doesn't it distribute the results?

IzzyMichiel - *June 9, 2018, 12:05 am*

ashwathama - *June 9, 2018, 1:12 am*
Interesting results, nice work.

Don't get me wrong but I have seen a crypter (free) with same GUI as yours here on HF , can't seem to find the thread atm.

GUI is a public theme called "netseal'.

Thanks,

I have received some PM for open beta.
They all will receive a PM soon when the new version is out with the license and informations... etc
I'll do 10 max slots for beta. Contact me now, first 10 will get the beta test free.

Thanks,

momokanich13 - *June 9, 2018, 4:56 am*
it sounds good work I would like to try

Hello,

Please send me a PM if you would like to participate in BETA testing.

Thanks,

Beta Slots Taken:
10/10 FULL
If you wish to use the crypter, you have to buy it after we ended BETA!

Contact me privately for the last spots! :)

Thanks,

I'll patch them for you. ?

But in all seriousness, doesn't yours have anti-VM features as well?

05317832892 - *June 10, 2018, 3:52 am*

Anti-VM on the crypter itself is sketch. Remove that and I would be happy to beta test. If not you can just send me a crypted putty for review.

(Jun 10, 2018 03:36 AM)M0HX Wrote: [CITE] Mine does have anti-VM feature but its in the stub produced (if you enabled that option)... NOT IN THE CRYPTER IT SELF.
Ah, I see, my bad. Shouldn't be too hard to disable it though (if it's allowed).
