Optional Update Coming soon:

Firefox 3.6 Password Stealer 3.6 added.

Windows LIVE Messenger Password Stealer added.

PC Information Module added.

You can choose to have both clients. People suggest that password stealers effect stability, and others suggest that password stealers are very nice to have. So, I decided to do both. Optional download. It's coming soon to the portal. The new stub is only 43 KB for this optional download (Without UPX - so it's still small)

For those who haven't purchased this yet, please do so! :)

Tech-N9ne - March 12, 2011, 4:15 pm

Vouch for this, recently bought it. And so far happy with it, has a nice GUI to it. Haven't tested the DDos yet though.

Also has heaps of skins to it, can change the skin of the DDoser. And the background to it. And for only \$25, worth it. But one thing, it keeps crashing :\

About 2 people have these issues. So I recoded certain parts like the DL/Exec and socket sniffing. Now, it seems like he doesn't have these problems anymore. Cheers :)

Next update: Adding more save options.

Edit: DL/Exec uses threads. (great method)

As for the new update coming soon:

- Advanced Registry Persistence.
- Change code to become less detected.
- Firefox 3.6 Password Stealer.
- Restart Server

I have bough DaRK DDoSeS v5 and im going to write a review.

[5/5]GUI:The GUI is amazing its clean and you can download 100 extra themes which is amazing

[4.5/5]Stability/DDoS:

It holded over 1.000 of bots so it's great for gathering bots and selling them and the dl and excution works great and there are 3 ddos options:HTTP for websites UDP for servers and SYN for home connections and when i had 30 bots i downd a small website and only 2 bots pingd out awesome isnt it ?

Suggestions: as finishing touch add a Password stealer and UPNP for people that dont know how to portforward.

I have had XR and DDoSer but my favorite will be DaRK DDoSeR v5

BIG VOUCH AGAIN!

You can't add shells to this. These are better than shells. Shells die out and are shared amongst people (which decreases power). Your own servers are used by only you. Making an update soon. Changed the settings of UDP flood. It is very strong now.

If you DDoS and you dont have this booter you might as well sell your dns. All around Perfect.

i recently bought this, and am very dissatisfied with it, after gaining 100 bots, i restarted my desktop and they were all gone.

Its an OK tool but if u can't reeboot your system its got a HUGE flaw.

LMFAO. This is only happening with you. maybe your ports closed. This is a comon misconception. You will not lose bots if you restart your PC, doesn't make sense. Everyone re-download the client from the Portal. It will not allow you to build a server unless you download it.

You need to re-open your ports.

You might have the wrong local ip on your dyndns or no-ip

I know my ports are all working, i have cybergate working like a charm, and am planning to get Blackshades later this week

EDIT:

The bug has been confirmed, I am not the only one to experience the problem. After some more testing, also spoke to a supporter who confirmed once 100 bots or so are gained the program likes to crash and becomes very unstable.?

Hello, HaLLaFaMeR x2. I was scammed by Beckyboy (this is his username in DDoSeR). I sent him the money and then he gave me invalid login details.

If you can help me, I also can send you pictures as proofs via PM.

Very big vouch for halla. Nice guy, and great product. The only thing I had at the time was a \$25 Walmart gift card, and he accepted it. THANKS !

Enjoy your headphones !!!

Eternity - May 22, 2011, 1:26 am

Lol @ members on the team scamming.

Halla I think you should kick them out. A lot of users PM me about buying the DDoser, and asking for my PayPal. But I always tell them to buy it from the web.

eXBTLegends - July 4, 2011, 6:18 am

I have v5.1 and when i edit the settings and close it then open it nothing saves and all my zombies are gone! whats going on with it

GØD - July 14, 2011, 4:53 am

Has anybody try hitting with this? If so can you post a video or something? Anybody....

Chris911Jacob - August 3, 2011, 5:06 am

Very Nice, I'll try purchasing it. See what happens!

EDIT:

I've bought it, But haven't got my details yet.

CRT - August 17, 2011, 6:20 am

Is this better than DDoSeR 4.2? reply back guys ?

?Mystical - August 19, 2011, 4:29 am

I bought this and it is one of the best host booters that i got.

K@??? - August 19, 2011, 6:00 am

Booter looks good man , good luck with selling . <3

Lobster - August 19, 2011, 6:05 am

I'm interested, but I got a quick question: Do they have to download like something for me to be able to DDOS them or any of the other features or could I just type in their IP and it will just DDOS / SYN them?

thanks could you please pm me your msn or just give it to me by replying

mangza - August 28, 2011, 5:27 am

Vouch fr this kid. he is a legit buyer. VERY LEGIT.

TROLLS GTFO

Faulttt - August 29, 2011, 3:49 am

Hands down the best booter I've purchased

Eternity - September 27, 2011, 4:42 pm

HaLLa please delete your messages so I can send one back. Or come on AIM more often.

CRT - September 27, 2011, 8:24 pm

Had some spare cash so I just bought this now :)

R3dhot - October 7, 2011, 1:18 pm

When I press "build" the program just crashes? Any fixes for this?

I'm using vista 32-bit.

HaLLaFaMeR x2 - March 16, 2012, 12:09 pm

Hello people. I would like to say that I have been busy with college and thats why I stopped developing dark ddoser. However, I am back and everyone should be expecting a HUGE update. I changed so many things. It looks great, and works even better. The server is still small in size too!

Changes made so far:

- New UDP flood
- New SSYN flood
- New Connection Socket (less problematic/wont lose connections)
- New 'Flood on Join'

- New GUI
- More customizable
- Saves ALL settings
- Autolisten on startup (multiports)

Working on:

- More password stealers
- "botkiller"
- ring0

- HaLLaFaMeR x2

This looks nice...Maybe I'll buy if I have the money ;)

I have this, there are 40 installs on it, but it can't even lag a home connection. Is that enough, because people say that should be a good amount to down a home connection :/

Make sure the port is open. My private ddoser brought down my friends connection for two days after udp flooding him. He had to reset his cisco router.

SpaDie - May 25, 2012, 12:42 pm

I have to ask you a question man nice booter btw.

Vouch for Dark DDoser its really stable and its a BOSS the new update was amazing.

?

HaLLaFaMeR x2 - June 1, 2012, 9:59 am

BUMP. DaRK DDoSeR v5.6 has been released. Proud to say it is the best network stresser out. With 5 flood options and password stealers. visit www.darkddoser.com for more information.

Editor Grizz™ - August 26, 2012, 10:38 pm

Vouch. Nice Product. Really Nice Interface.
Keep Up The Awesome Work.
