Thread: [My new \\$400 Gas Blow Back Gun](#)

Hotsauce™ - March 13, 2011, 12:00 am

I just got the WE Tech M4 Version 3 Gas Blow Back Rifle today, I never got to play it in a match or a field yet. I cant believe that i spent \$400 dollars on a Airsoft gun =S

I think it was worth it, the gun is as close to a real M4. It dismantles like a real M4, which is fucking sick! The gun is fully metal except the butt stock and hand guards. Other than that its fully metal. With the gun fully loaded i would say its roughly 7-10 pounds.

I would suggest getting one of these if you like the blow back action. It does require more maintenance, if you don't take care of it it will break since is fully metal. The blow back is crazy, nothing like those AEG Blow backs, this is like 10 times stronger and you will feel the kick. The Magazine holds 30 BB's, like a real M4. You cannot go full automatic with this gun because your clip is gone in seconds. The gun itself is pretty accurate, if you use the right BB's

I have to lower the FPS in order to play. (The gun shoots around 400-460 FPS, i need it under 400 FPS)

I am going to be buying another Gas blow back rifle, the next gun I will be buying is the WE Tech G39C (G36C). This gun is slightly less powerful, 380-400 fps, but has a bigger blow back action.

Spray paint the orange part black, then go outside and walk around in the street. It's fun, trust me, I do it all the time.

That's pretty sick. I know that type of rifle inside and out. Been trained on it, well the different version, known as the C7-A1 and A2. It is the M4 basically. :) That is the correct weight too, that's actually pretty legit. The real thing is better to use though. :D Just saying. Haha

Haha lets not. Don't feel like getting shot by the cops. Plus the arena place where i will be going requires the orange tip. Well you can't go around and play with a real M4, hahaha. I don't want to kill some one.

H??????a X™ - March 13, 2011, 12:20 am

Lmao, that is true. Oh well, I guess that will do then. xD

GreenLee - March 13, 2011, 12:44 am

omfg i really like that gun i was using it when I was playing CS 1.6!

masterfan - March 13, 2011, 4:38 am

god damn nice ,you should spray that orange part .Gonna look better :D

I might get a new flash hider, since the flash hider is removable just so i can fuck with people. Im about to order a tactical vest, its close to what the US Special Forces wear.

Warhawk - March 13, 2011, 8:56 pm

I liked looking at the dual monitor set up more than the gun, haha.

Nice airsoft gun though.

-mothered- - March 13, 2011, 9:44 pm

Now that looks so hot. If you walk down the street with It In full combat gear, I reckon you'll be arrested within a few minutes!

I love It mate.

Haha me and my friend both have gas blow back rifles and we are going to put on our tactical vests, put on the throat radios (I dont know what its called). We are planning on just driving with our full tactical vest, loaded with mags and just drive around and see peoples reaction.

Of course we wont have the gun ^^
