Thread: Bring back "Members who are viewing this thread"

Fiber - *November 10, 2018, 2:17 pm*
I'm not sure if I'm the only one who wants this feature returned to the forum but I've only just noticed that you can no longer see who is browsing the same thread as you. I'd like to see it returned if possible.

Terry A. Davis - *November 10, 2018, 2:19 pm*
Eh, seems kinda useless if no one before now has missed it do we really want it back?

N1ghtm4re - *November 10, 2018, 2:22 pm*
Someone already asked about this and Omni said he changed it due to mobile issues or something like that, and that he probably wont be bringing it back.

That's true, it was useless but it's a small feature that myself really enjoyed and if it could do that to other members too then why not bring it back.

I would also like to see this back. I found it extremely useful when I used to sell my VPN on HF. I'd reach out to customers viewing the thread occasionally and most of the time I'd be able to win them as a customer that I wouldn't have otherwise had.

Little things like this make a big difference for market place sellers who utilize them.

Oh I see, thanks for clearing that up for me.

/Thread

Kumara - *November 10, 2018, 2:27 pm*
I wish it was back, as well.

This is one of the features I actively used, to find the quality of members who are browsing my threads, to also see which kind of traffic my threads target.

I would usually click the members and check their posts, so I can learn more about advertisement techniques.

Bring it back!

Another good idea from a small but useful feature that we had for a long time on the forum.

I remember whenever a large event or dramatic thread was posted watching the viewing list grow larger and larger every refresh.

Bluffer - *November 10, 2018, 2:38 pm*
I also would really like to see this feature back.

This works the same for competitors trying to poach your customers.

I kind of prefer it without in the marketplace.

Slightly off topic, but I'm not sure if it's a userscript I have installed or just the way it is.

But on Desktop I never see "Who's online" on the home page. But on Mobile I do

zeroday - *November 10, 2018, 2:42 pm*
There is still a way to view who is viewing your thread. Mr. Robot made a thread about it somewhere

Eagle 95 - *November 10, 2018, 2:48 pm*
It was removed due to mobile optimization if I'm not mistaken so it probably won't be back.

I know X is putting in some good work, I wonder if this could be an option to have on the deskop version of the site only? Hopefully.

Omniscient - *November 10, 2018, 3:37 pm*
If it comes back it has to be disabled for mobile view. It pushed the content down too much imho. You don't want to visit a page and scroll too far to see content.

That's entirely understandable.

I do feel like it's something I miss from my desktop browsing experience.

I agree about mobile but the option to have it on the desktop version would be fab edition to the sites feature list

Leads - *November 11, 2018, 3:30 pm*

Haha i would love to see this brought back to desktop, or at the bottom of the page or something!

Sixen+ - *November 11, 2018, 3:32 pm*

I would love to see this back. I always wondered what happened to it.

No actually. I think how threads display are just fine as-is.

That's a shame, no bother worth a shot

BeldBoi - *February 16, 2020, 5:55 pm*

ya i agree would be nice to see this come back as very much needed here

Mix - *February 16, 2020, 9:22 pm*

There is no real point of this feature being brought back. The feature if anything just adds an annoying name or two at the top of a thread. Pointless.
