Big vouch! once purchased I received the builder. So far I tested the stub in Sandboxie and it works great!
Didn't even have to crypt it, it bypasses windows defender scantime&runtime very nice :)

Yes, yes you are. I told you I would find every scam thread you make and report them, you will never scam another poor person on this forum again with your garbage threads.

This is the exact "review" this guy leaves with his alt accounts on Qcode's threads.

Use ya brain and don't fall for this one.

Don't be that guy who gives a high five to a repeat scammer who has no real skills and can't make any of their own money.

You're pathetic, trying to scam people for pennies when you could be stacking up cash.
