Thread: [Ventrilo Client Crasher](#)

Yoinks - March 13, 2011, 3:48 pm

Hey I know a lot of people already have this but its pretty cool. Its a ventrilo crasher that doesn't actually crash the vent server, but you go into a channel and Q your mic and crash everyone out in the channel. It comes in handy sometimes and is pretty fun to rage people with. It forces the clients stop responding.(whoever in the channel with you when your mics qued)

Heres a link to the program

Enjoy.

I actually haven't come across this before, so I'll check out It's functionality shortly.

Thank you.

Yoinks - March 13, 2011, 4:05 pm

No problem. Yeah I had this for a while then lost it and it was really hard to find the original copy again, but here it is.

Darkfader - March 13, 2011, 4:06 pm

Hmm bit weird you have virus scan of other file at your post.
here is correct one.

O sorry when I uploaded it it said the file had already been uploaded and thats the link it gave me.

NoC47 - March 13, 2011, 5:50 pm

Thanks for uploading this, going to check it out.

Sc00by - March 13, 2011, 6:23 pm

Works like a charm for me, good upload! :)

JamaJackson - March 17, 2011, 5:31 pm

Works great, Yoinks gave me this a few months back!

DELIJA - March 17, 2011, 5:58 pm

THANKS BRO... WORKS GREAT?

TheBarret - April 4, 2011, 3:10 pm

Nvm, nice upload, thanks.

XKarnageX - April 4, 2011, 3:53 pm

Is there a way to patch your vent client against this? funny shit.

Toscan - April 17, 2011, 8:48 pm

how do u use it looks like a regular vent application?

KruelOxygen - April 17, 2011, 8:59 pm

how do you do it? lol i thought u ment make PTT Q so i did and im not getting it to work but i have no idea what you mean by Q your mic

Mike Bars - April 17, 2011, 9:16 pm

i will have to take a look at this later.
thanks for the share.

FreshX - April 18, 2011, 9:03 am

Nice! Currently download will edit post to say if it works for me :P

KruelOxygen - April 18, 2011, 2:50 pm

can somebody tell me how this works?? and also can u boot vents offline with a booter or something

Ayden™ - April 19, 2011, 2:23 am

This mite be a old thread, but i want to try this out, i just downloaded it and ran it, it looks like the normal vent server. AnyWAY how do i use it???

Ayden™ - April 21, 2011, 8:22 am

fuck someone post bitch

JamalJackson - May 17, 2011, 8:53 pm

Grave digging but, all you do is go into the channel and attempt to talk by pressing your push to talk key, it will crash everyone in the channel.

Jewfro - June 13, 2011, 1:26 pm

I tried it an it doesn't work, not for me at least, nobody crashed from it.

McClubbin - March 10, 2019, 10:45 pm

bumo OP forgot to leave out circumstantial ports and IPs for the crasherr to work.
