Money and google go a long way ?
Spynote 6 is like 500$ and all known “Unkown Rat” copies are infected so you choose

No.
Spynote maybe, but unknown rat is garbage and gautenteed backdoored

**nemosky** - *January 28, 2019, 8:24 am*
i have the working unknown rat, and am willing to send you a sendspace download link if you can give a good site to buy the java crypter that still works for unknown

I just would not. All unkown rat cracks are backdoored I doubt this member can provide a clean one, just a warning to OP ?

**nemosky** - *January 28, 2019, 8:41 am*
ofcos i cannot get you a clean one..i only use my unknown in RDP, not directly on my pc

Correct me if I'm wrong. Even if they are infected, You can create some virtual box machine on Your Linux / Mac computer and turn this software in Sandboxie. What You think about this? Is it good way to turn on some apps downloaded from internet?

Yea this is a good point. But in the grand scheme of things is a bad idea still because the backdorers (or the person who backdoored it originally) could have a way to steal the clients connecting to you :) trust me that's easily possible

In as much as I want to agree with you, I don't think the UNKNOWN RAT is garbage and guaranteed backdoored. Simply put you have difficulties using this type of RAT because from most people I've installed it for are enjoying it and most especially when it's exploited.

However the Spynote is a quality RAT, but I can say I go with the Unknown RAT anyday and anytime.

Can someone explain why can't people use ProGuard to obfuscate their Unknown RAT stub? Iv used it when the RAT was available and it worked like a charm. :)

Bro unknown rat is upgrading they are designing a new fresh Rat meanwhile the unknown is still working but not 100% effective here is the new qrypter site mind you i will not put dort because of the link i will use space then copy and then fix it with the dort ...: store_qua_one
take away the two  replace them with .  . goto youe google to search it.....

i need download link for working v unknown rat

**andrewtaylor22** - *August 30, 2020, 7:59 pm*
Unknown rat is not working again and there is no crypter for the bullshits some people are sharing here, patiently wait for the unknown guys to upgrade or relaunch fresh stuff
